

| Program Name | $:$ Diploma in Automobile Engineering / Mechanical Engineering |
| :--- | :--- |
| Program Code | $:$ AE/ME |
| Semester | $:$ Fourth |
| Course Title | $:$ Theory of Machines |
| Course Code | $: 22438$ |

## 1. RATIONALE

Knowledge of various mechanisms and machines is a pre-requisite for enabling a mechanical engineer to work in an industry. This course provides the knowledge of kinematics and dynamics of different machine elements and popular mechanisms such as four link mechanisms, cam-follower. belt-pulley. chain sprocket, gears, flywheel, brake and clutch to enable a diploma holder to carry out maintenance of these and it also serves as a prerequisite for course 'Elements of Machine Design' to be studied in later semester.

## 2. COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- Use principles of kinematics and dynamics in maintenance of various equipment.

## 3. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented. so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:
a. Identify various links in popular mechanisms.
b. Select suitable mechanism for various applications.
c. Interpret the motion of cams and followers.
d. Recommend relevant belts, chains and drives for different applications.
e. Choose relevant brakes and clutches for various applications
f. Select suitable flywheel and governor for various applications.

## 4. TEACHING AND EXAMINATION SCHEME

| Teaching Scheme |  |  | $\begin{gathered} \text { Credit } \\ (\mathrm{L}+\mathrm{T}+\mathrm{P}) \end{gathered}$ | Examination Scheme |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| L | T | P |  | Theory |  |  |  |  |  |  | Practical |  |  |  |  |  |
|  |  |  |  | Paper Hrs. | ESE |  | PA |  | Total |  | ESE |  | PA |  | Total |  |
|  |  |  |  |  | Max | Min | Max | Min | Max | Min | Max | Min | Max | Min | Max | Min |

(*): Under the theory PA, Otll of 30 marks, 10 marks are for micro-project assessment to facilitate integration of COs and the remaining 20 marks is the average of 2 tests to be taken during the semester for the assessment of the cognitive domain UOs required for the attcinment of the COs.
Legends: L-Lecture; $\boldsymbol{T}$ - Tutorial/Teacher Guided Theory Practice; P - Practical; C-Credit, ESE - End Semester Examination; PA - Progressive Assessment,@) Internal Assessment, \# External Assessment, *\# On Line Examination, ^ Computer Based Assessment
5. COURSE MAP (with sample COs. PrOs, JOs. ADOs and topies)

This course map illustrates an overview of the flow and linkages of the topies at various levels of outcomes (details in subsequent sections) to be attained by the student by the end of the course, in all domains of learning in terms of the industry/employer identified competency depicted at the centre of this map.

Figure 1 - Course Map

## 6. SUGGESTED PRACTICALS/ EXERCISES

The practicals in this section are PrOs (i.e. sub-components of the COs) to be developed and assessed in the student for the attainment of the competency.

| S. <br> No. | Practical Outcomes (PrOs) | Unit <br> No. | Approx. <br> Hrs. <br> Required |
| :--- | :--- | :---: | :---: |
| 1 | Measure the ratio of time of cutting stroke to the return stroke in <br> shaping machine by varying the stroke length. Following activities <br> need to be performed: (Part I) <br> a. Measuring dimensions of different links of given shaper machine <br> b. Sketching | I | $02^{*}$ |

| $\begin{gathered} \mathrm{S} . \\ \text { No. } \end{gathered}$ | Practical Outcomes (PrOs) | $\begin{aligned} & \text { Unit } \\ & \text { No. } \end{aligned}$ | Approx. Hrs. Required |
| :---: | :---: | :---: | :---: |
|  | c. Labeling of sketch |  |  |
| 2 | Measure the ratio of time of cutting stroke to the return stroke in shaping machine by varying the stroke length. Following activities need to be performed: (Part 11) <br> a. Measuring dimensions of different links of given shaper machine <br> b. Sketching <br> c. Labeling of sketch | 1 | 02* |
| 3 | Estimate important kinematic data related to following mechanisms to sketch them. <br> a) Bicycle free wheel sprocket mechanism <br> b) Geneva mechanism | I | 02 |
| 4 | Estimate important kinematic data related to following mechanisms to sketch them. <br> a) Ackerman's steering gear mechanism <br> b) Foot operated air pump mechanism | 1 | 02 |
| 5 | Determine velocity and acceleration of various links of the given mechanism (any two) by relative velocity method for analysis of motion of links (Minimum 2 problems on A2 size drawing sheet). | II | 04* |
| 6 | Determine velocity and acceleration in an I. C. engine's slider crank mechanism by Kleins's construction (Minimum 2 problems on A2 size drawing sheet). | II | 02 |
| 7 | Draw profile of a radial cam for given follower type to obtain the desired follower motion (Minimum 2 problems on A2 size drawing sheet). Part I | III | 02* |
| 8 | Draw profile of a radial cam for given follower type to obtain the desired follower motion (Minimum 2 problems on A2 size drawing sheet). Part II | III | 04 |
| 9 | Estimate slip. length of belt, angle of contact in an open and cross belt drive. | IV | 02* |
| 10 | Calculate breaking torque required in different breaks at different speeds and load situations. | IV | 02 |
| 11 | Assemble and dismantle different clutches. (Part I) | V | 02* |
| 12 | Assemble and dismantle different clutches. (Part II) | V | 02* |
| 13 | Measure radius and height of all types of governors for different rotational speeds. mass of balls and spring stiffness (in spring loaded governors) | V | 02* |
| 14 | Perform balancing of rotating unbalanced system | VI | 02* |
|  | Total |  | 32 |

## Note:

i. A suggestive list of $\operatorname{PrOs}$ is given in the above table. More such PrOs can be added to attain the COs and competency. A judicial mix of minimum 12 or more practical need to be performed, all practicals are compulsory, so that the student reaches the 'Precision Level' of Dave's 'Psychomotor Domain Taxonomy' as generally required by the industry.
ii. The 'Process' and 'Product' related skills associated with each PrO is to be according to a suggested sample given below:

| S. No. | Performance Indicators | Weightage in \% |  |  |
| :--- | :--- | :---: | :---: | :---: |
| 1 | Preparation of experimental set up | 20 |  |  |
| 2 | Setting and operation | 20 |  |  |
| 3 | Safety measures | 10 |  |  |
| 4 | Observations and Recording | 10 |  |  |
| 5 | Interpretation of result and conclusion | 20 |  |  |
| 6 | Answer to sample questions | 10 |  |  |
| 7 | Submission of report/sheets in time | 10 |  |  |
| Total |  |  |  | $\mathbf{1 0 0}$ |

The above PrOs also comprise of the following social skills/attitudes which are Affective Domain Outcomes (ADOs) that are best developed through the laboratory/field based experiences:
a. Follow safety practices.
b. Practice good housekeeping.
c. Demonstrate working as a leader/a team member.
d. Maintain tools and equipment.
c. Follow ethical Practices.

The ADOs are not specilic to any one PrO, but are embedded in many Pros. Hence, the acquisition of the ADOs takes place gradually in the student when $s / h e$ undertakes a series of practical experiences over a period of time. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

- 'Valuing Level' in $1^{\text {st }}$ year
- 'Organising Level' in $2^{\text {nd }}$ year
- 'Characterising Level' in $3^{\text {rd }}$ year.

## 7. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of experiments, as well as aid to procure equipment by authorities concerned.

| S. <br> No. | Equipment Name with Broad Specifications | PrO. No. |
| :--- | :--- | :--- |
| 1. | Working models of bicycle free wheel sprocket mechanism, geneva <br> mechanism, Ackerman's steering gear mechanism and foot operated <br> air pump mechanism, slider crang mechanism, elliptical trammel, <br> skotch yoke mechanism, oldham's coupling, hooks joint, inversions <br> of four bar mechanisms. | $03,04,05,06$ <br> and for demo <br> in theory class <br> for unit-I and <br> II |
| 2. | Working models of locomotive coupler, Beam engine, Pantograph, <br> Pendulum pump, Rotary I.C. engine mechanism, Oscillating cylinder <br> engine, Whitworth quick return Mechanism, Quick return mechanisn <br> of shaper, Scotch Yoke mechanism, Elliptical trammel and Oldham's <br> Coupling. | and for demo <br> and <br> in theory class <br> for unit-1 <br> II |
| Working models of various cam follower arrangements for |  |  |
| demonstration. |  |  |

| S. <br> No. | Equipment Name with Broad Specifications | Pro. No. |
| :---: | :--- | :---: |
| 4. | Working models with different belts in different arrangements. | 09 |
| 5. | Working and cut section models of various types of brake assemblies. | For demo in <br> theory class <br> for unit-V |
| 6. | Various types of clutch assemblies. | 11 |
| 7. | Working models of various types of governors. <br> 8.Working models of <br> a. various belt drives, <br> b. chain and sprocket, <br> c. various gear drives. | For demo in <br> theory class <br> for unit-IV |
| 9. | Working Models of Gear trains - all types.(Simple, compound, <br> reverted. epicyclical). | For demo in <br> theory class <br> for unit-IV |
| 10. | Balancing Machines -Revolving masses, Reciprocating masses | 14 |

## 8. UNDERPINNING THEORY COMPONENTS

The following topics are to be taught and assessed in order to develop the sample UOs given below for achieving the COs to attain the identified competency. More UOs could be added.

| Unit | Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
| Unit - I <br> Fundamen <br> tals and <br> type of Mechanis ms | 1a. Identify various links in the given figure of the mechanism with justification. <br> 1b. Describe with sketches the constructional details of the given type of mechanism <br> 1c. Select suitable mechanism for the given application with justification. <br> 1d. Select suitable material of the mechanism for the given application with justification. | 1.1 Kinematics of Machines: <br> Introduction to Statics; Kinematics, Kinetics, Dynamics; Kinematic links, joints, pairs, chain and its types; Constrained motion and its types, Inversion, Mechanism, Machine and Structure. <br> 1.2 Inversions of Kinematic Chains and their materials: <br> Four bar chain - Locomotive coupler, Beam engine and Pantograph. Single slider Crank chain - Pendulum pump, Rotary I.C. engine mechanism, Oscillating cylinder engine, Whitworth quick return Mechanism, Quick return mechanism of shaper; Double Slider chain - Scotch Yoke mechanism, Elliptical trammel, Oldham's Coupling. |
| Unit-II <br> Velocity <br> and <br> Acceleratio <br> n in Mechanis ms | 2a. Use analytical method (without derivation) to calculate the velocity and acceleration of given links in the given single slider crank mechanism <br> 2b. Estimate velocity and | 2.1 Concept of relative velocity and relative acceleration of a point on a link, angular acceleration, inter-relation between linear and angular velocity and acceleration. <br> 2.2 Analytical method and construction to determine velooity and |

| Unit | Unit Outcomes (UOS) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
|  | acceleration of any link at any instant in the given mechanism. <br> 2c. Describe with dimensioned sketch of the given mechanism. <br> 2d. Describe with velocity diagram for a given mechanism using relative velocity method. <br> 2e. Describe with acceleration diagram for the given mechanism. <br> 2f. Explain with velocity and acceleration diagram for the given mechanism using Klein's construction. | acceleration of diflerent links in single slider crank mechanism. <br> 2.3 Drawing of velocity and acceleration diagrams for simple mechanisms. Determination of velocity and acceleration of point on link by relative velocity method (Excluding Coriollis component of acceleration) |
| Unit- III <br> Cams and Followers | 3a. Identify the type of motion of follower in the given situation with justification. <br> 3b. Describe with dimensioned sketch of the given cam and follower arrangement. <br> 3c. Describe with cam profile for the given motion of knife-edge and roller follower with and without offset application using Graphical method. | 3.1 Introduction to Cams and Followers. Cam and follower terminology. Classification of Cams and Followers. Applications of Cams and Followers. <br> 3.2 Types of follower motions and their displacement diagrams -Uniform velocity, Simple harmonic motion, uniform acceleration and retardation. <br> 3.3 Drawing of profile of a radial cam based on given motion of reciprocating knifeedge and roller follower with and without offset. |
| Unit-IV <br> Belt, <br> Chain and Gear <br> Drives | 4a. Calculate velocity ratio, belt tensions, slip and angle of contact in the given belt drive. <br> 4b. Estimate power transmitted and condition for maximum power transmitted in the given belt drive for given data. <br> 4c. Select suitable belt for the given application with justification. <br> 4d. Calculate Train value and velocity ratio for the given simple, compound, reverted and epicyclic gear trains using spur and helical gears. | 4.1 Belt Drives - Introduction to Flat belt, V-belt and its applications, materials used for flat and V-belts. Introduction of timing belt and pulley. Angle of lap, length of belt, Slip and creep. Determination of velocity ratio of tight side and slack side tension, centrifugal tension and initial tension, condition for maximum power transmission. Merits, demerits and selection of belts for given applications. <br> 4.2 Chain Drives - Introduction to chain drives, Types of chains and sprockets, Methods of lubrication. demerits and selection of chains 3 sfof given applications. <br> 4.3 Gear Drives - Introduction G50 gear |

| Unit | Unit Outcomes (UOS) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
|  | 4e. Select suitable gear for the given application with justification. <br> 4f. Select suitable drives for the given application with justification. | drives, Classification of gears, Law of gearing, gear terminology, Types of gear trains, Train value and velocity ratio for simple, compound, reverted and epicyclic gear trains using spur and helical gears. Merits, demerits and selection of gear drives for given applications. |
| Unit-V <br> Brakes and Clutches | 5a. Calculate braking force, braking torque and power lost in friction in the given shoe and band brake for the given data. <br> 5b. Explain with sketches the various parts of the given brakes with their functions and constructional details. <br> 5 c . Describe with sketches the needs, functions and applications of the given clutches. <br> 5d. Explain with sketches the various parts of the given clutch with their functions and constructional details. | 5.1 Introduction to Brakes - Types, Functions and Applications. <br> 5.2 Construction and principle of working of i) Shoe brake, ii) Band brake iii) Internal expanding shoe brake iv) Disc Brake. <br> 5.3 Braking force, braking torque and power for shoe and band brake. <br> 5.4 Clutches-Uniform pressure and Uniform Wear theories. Introduction to Clutch Types. Functions and Applications, Construction and principle of working of a. Single-plate clutch, <br> b. Multi-plate clutch, <br> c. Centrifugal Clutch <br> d. Cone clutch <br> e. Diaphragm clutch. |
| Unit -VI <br> Flywheels, <br> Governors <br> and <br> Balancing | 6a. Explain with sketches the method of balancing a rotating mass as per the given conditions. <br> 6b. Estimate the balancing mass and position of plane analytically and graphically in the given situation for the given data. <br> 6c. Explain with sketches the turning moment diagram for the given single cylinder 4-Stroke I.C Engine for the given data. | 6.1 Flywheel-Introduction to flywheel need, function and application of flywheel with the help of turning moment diagram for single cylinder 4Stroke I.C Engine. <br> 6.2 Coefficient of fluctuation of energy, coefficient of fluctuation of speed and its significance. <br> 6.3 Governors- Introduction, types, functions and applications, Terminology of Governors. Comparison of Flywheel and Governor. <br> 6.4 Balancing- Need and types of balancing, Balancing of single rotating mass, Analytical and Graphical methods for balancing of several masses revolving in same plane. |

Note: To attain the COs and competency, above listed UOs need to be undertaken to achieve the 'Application Level' and above of Bloom's 'Cognitive Domain Taxonomy'.
9. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Unit <br> No. | Unit Title | Teaching | Distr | ution of | Theor | Marks |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I |  | Hours | $\begin{gathered} \text { R } \\ \text { Level } \end{gathered}$ | $\begin{gathered} \mathrm{U} \\ \text { Level } \end{gathered}$ | $\begin{gathered} \text { A } \\ \text { Level } \end{gathered}$ | Total Marks |
| I | Fundamentals and type of <br> Mechanisms | 10 | 04 | 06 | 04 | 14 |
| II | Velocity and Acceleration in Mechanisms | 06 | 02 | 04 | 04 | 10 |
| III | Cams and Followers | 08 | 04 |  |  |  |
| IV | Belt, Chain and Gear Drives | 10 | 04 | 04 | 04 | 12 |
| V | Brakes and Clutches | 06 | 02 | 04 | 06 | 14 |
| VI | Flywheels, Governors and Balancing | 08 | 02 | 02 | 04 | 08 |
| Total |  | 08 | 02 | 04 | 06 | 12 |
|  |  | 48 | 18 | 24 | 28 | 70 |

Legends: $R=$ Remember, $U=$ Understand, $A=$ Apply and above (Bloom's Revised taxonomy) Note: This specification table provides general guidelines to assist student for their learning and to teachers to teach and assess students with respect to attainment of UOs. The actual vary from above table.

## 10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related co-curricular activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:
a. Prepare journal of practicals.
b. Undertake micro-projects.
c. Compile information from internet related to various mechanisms/elements like piston, crank, connecting rod, cam, clutch, brake, flywheel, governor, or animation of mechanism etc. along with functions and arcas of application of each.
d. List the mechanisms which you are using in your day to day life. Sketch any three from these.
e. List the different mechanisms used in a typical car.
f. Identify and measure the dimensions of Flywheel used in automobile engines, generators, punching and riveting machines.
g. Identify the type of clutches used in different automobiles and also the type of brakes in automobile and bicycle.
h. Visit the market and collect the data of items which are used in any mechanisms. Data includes specifications, cost, applications. etc. Also name the mechanism/s in which such item/s is/are used.

## 11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any) <br> These are sample strategies, which the teacher can use to accelerate the attainment of the

 various learning outcomes in this course:a. Massive open online courses (MOOCs) may be used to teach various topics/sub topics.
b. ' $L$ ' in item No. 4 does not mean only the traditional lecture method. but different types of teaching methods and media that are to be employed to develop the outcomes.
c. About $15-20 \%$ of the topics/sub-topics which is relatively simpler or descriptive in nature is to be given to the students for self-directed learning and assess the development of the COs through classroom presentations (sce implementation guideline for details).
d. With respect to item No.10, teachers need to ensure 10 create opportunities and provisions for co-curricular activities.
e. Use Flash/Animations to explain various mechanisms.
f. Guide student(s) in undertaking micro-projects
g. Encourage students to refer different websites for deeper understanding of the course.
h. Monitor the performance of students in Lab.
i. Show models, education charts and videos, real life examples of various mechanisms.
j. Demonstration of real industrial parts and mechanisms used in different devices.
k. Demonstration of different real industrial parts, cams, power transmission elements through movies/animations.

1. Industrial visit, animations/movies, models of different types of governors.

## 12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the beginning of the semester. In the first four semesters, the micro-project are group-based. However, in the fifth and sixth semesters, it should be preferably be individually undertaken to build up the skill and confidence in every student to become problem solver so that $\mathrm{s} /$ he contributes to the projects of the industry. In special situations where groups have to be formed for micro-projects, the number of students in the group should not exceed three.

The micro-project could be industry application based, internet-based, workshop-based, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The total duration of the micro-project should not be less than 16 (sixteen) student engagement hours during the course. The student ought to submit micro-project by the end of the semester to develop the industry oriented COs.

A suggestive list of micro-projects are given here. Similar micro-projects could be added by the concerned faculty:
a. Prepare working model of any one mechanism using low cost materials.
b. Prepare animations of various mechanisms using free software's available on internet.
c. Market survey of belts for collecting specifications,.
d. Field survey to collect information about applications of timing belts.
e. Field survey to collect information about applications of flywheels and governors.

## 13. SUGGESTED LEARNING RESOURCES

| S. <br> No. | Title of Book | Author | Publication |

| Program Name | $:$ Diploma in Mechanical Engineering |
| :--- | :--- |
| Program Code | $:$ ME |
| Semester | $:$ Fourth |
| Course Title | $:$ Mechanical Engineering Measurements |
| Course Code | $: 22443$ |

## 1. RATIONALE

Measurement activities are given prime importance in industry. The art of measurement plays an important role in all branches of engineering. With advances in technology, measurement techniques have also taken rapid strides, with many types of instrumentation devices, innovations, refinements. The course aims at making a Mechanical Engineering diploma holder familiar with the principles of instrumentation. transducers and measurement of non electrical parameters like temperature, pressure, flow, speed, force, torque for engineering applications.

## 2. COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- Use relevant analog and digital measuring devices in mechanical engineering related applications.

## 3. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be faught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:
a. Use relevant instrument for measuring displacement.
b. Use relevant instrument for measuring force and torque.
c. Use relevant pressure and temperature measuring instruments.
d. Use relevant instruments for measurement of flow.
e. Select relevant instruments for measurement of vibration and strain.
f. Select relevant instruments for speed and sound measurement.

## 4. TEACHING AND EXAMINATION SCHEME

| Teaching Scheme |  |  | $\begin{gathered} \text { Credit } \\ (\mathrm{L}+\mathrm{T}+\mathrm{P}) \end{gathered}$ | Examination Scheme |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| L | T | P |  | Theory |  |  |  |  |  |  | Practical |  |  |  |  |  |
|  |  |  |  | Paper Hrs. | ESE |  | PA |  | Total |  | ESE |  | PA |  | Total |  |

$\left(^{*}\right)$ : Under the theory PA, Out of 30 marks, 10 marks are for micro-project assessment to facilitate integration of COs and the remaining 20 marks is the average of 2 tests to be taken during the semester for the assessment of the cognitive domain UOs required for the altainment of the COs.
Legends: L-Lecture; $\boldsymbol{T}$ - Tutorial/Teacher Guided Theory Practice; $\boldsymbol{P}$ - Practical; $\boldsymbol{C}$-Credij ESE - End Semester Examination; PA - Progressive Assessment, @ Internal Assessment. \# External Assessment, *\# On Line Examination, ^ Computer Based Assessment
5. COURSE MAP (with sample COs. PrOs, UOs, ADOs and topies) This course map illustrates an overview of the flow and linkages of the topics at various levels of outcomes (details in subsequent sections) to be attained by the student by the end of the course, in all domains of learning in terms of the industry/employer identified competency depicted at the centre of this map.

Figure 1 - Course Map

## 6. SUGGESTED PRACTICALS/ EXERCISES

The practicals in this section are PrOs (i.e. sub-components of the COs ) to be developed and assessed in the student for the attainment of the competency:

| $\begin{gathered} \text { S. } \\ \text { No. } \end{gathered}$ | Practical Outcomes (PrOs) | Unit <br> No. | Approx. Hrs. |
| :---: | :---: | :---: | :---: |
| 1 | Identify contact and Non-Contact Type Instruments |  | Required |
| 2 | Calibration of LVDT transducer for displacementMeasurement | II | 02* |
| 3 | Use Load cell to measure force on given system. | II | 02* |
| 4 | Measure Force Using Eddy Current Dynamometer. | II | 02* |
| 5 | Calibration of Bourdon's Pressure gauge | III | $02 *$ |
| 7 | Calibration of Thermocouple | III | 02 |
|  |  | III | -12* |

| S. <br> No. | Practical Outcomes (Pros) | Unit <br> No. | Approx. <br> Hrs. <br> Required |
| :--- | :--- | :---: | :---: |
| 8 | Measure flow of liquid by Rotameter | IV | 02 |

## Note

i. A suggestive list of $\operatorname{PrOs}$ is given in the above tahle. More such $\operatorname{PrOs}$ can be added to attain the COs and competency. A judicial mix of minimum 12 or more practical need to be performed, out of which, the practicals marked as '*' are compulsory, so that the student reaches the 'Precision Level' of Dave's 'Psychomotor Domain Taxonomy' as generally required by the industry.
ii. The 'Process' and 'Product' related skills associated with each $\operatorname{PrO}$ is to be assessed according to a suggested sample given below:

| S. No. | Performance Indicators | Weightage in \% |
| :--- | :--- | :---: |
| 1 | Preparation of experimental set up | 10 |
| 2 | Handling of measuring instruments carefully while <br> performing the practical. | 10 |
| 2 | Setting and operation | 30 |
| 3 | Safety measures | 10 |
| 4 | Observations and recording | 10 |
| 5 | Interpretation of result and conclusion | 10 |
| 6 | Answer to sample questions | 10 |
| 7 | Submission of report in time | 10 |
|  | Total | $\mathbf{1 0 0}$ |

The above PrOs also comprise of the following social skills/attitudes which are Affective Domain Outcomes (ADOs) that are best developed through the laboratory/field based experiences:
a. Follow safety practices.
b. Practice good housekeeping.
c. Practice energy conservation.
d. Demonstrate working as a leader/a team member.
e. Maintain tools and equipment.
f. Follow ethical Practices.

The ADOs are not specific to any one PrO , but are embedded in many PrOs. Hence, the acquisition of the ADOs takes place gradually in the student when s /he undertakes a seriesabl OF TE practical experiences over a period of time. Moreover, the level of achievement of the ADOS
according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

- 'Valuing Level' in $1^{\text {st }}$ year
- 'Organising Level' in $2^{\text {nd }}$ year
- 'Characterising Ievel' in $3^{\text {rd }}$ year.

## 7. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in miformity in conduct of experiments, as well as aid to procure equipment by authorities concerned.

| $\begin{gathered} \text { S. } \\ \text { No. } \end{gathered}$ | Equipment Name with Broad Specifications | $\begin{gathered} \text { Pro. } \\ \text { No. } \end{gathered}$ |
| :---: | :---: | :---: |
| 13 | Sling Psycrometer: The Sling Psychrometer measures RH between 10 and $100 \%$ (for dry bulb temperatures between 30 and $100^{\circ} \mathrm{F}$ ) with an accuracy of $\pm 5 \%$; Measurement Range : Dry/wet bulb temperature : 25 to $120^{\circ} \mathrm{F}$ or -5 to $+50^{\circ} \mathrm{C}$ (see ordering information); Relative humidity (RH) : 10 to $100 \%$, for dry bulb temperature between 30 and $100^{\circ} \mathrm{F}\left(-1\right.$ and $\left.38^{\circ} \mathrm{C}\right)$ | 12 |
| 14 | Sound meter: LCD backlight for clear reading. Wide measuring range: $30-$ 130 dB .Sound level measurement. in./Max./Lock current value. Hold the measurement data; Manual/auto shutoff. Equipped with sponge ball. Portable and easy to use suitable for sound quality control in factory, office, home, school and construction site. | 13 |
| 15 | Multi digital stratoscope cum tachometer for speed measurement- upto 5000 rpm | 14 |

## 8. UNDERPINNING THEORY COMPONENTS

The following topics are to be taught and assessed in order to develop the sample UOs given below for achieving the COs to attain the identified competency. More UOs could be added.

| Unit | Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
| Unit - I <br> Introduction to <br> Measurement | 1a. Identify different characteristics of the given instrument. <br> 1b. Identify the error in the given instrument. <br> 1c. Classify the transducers for the given application. <br> 1d. Identify the given contact and non-contact transducer with justification. | 1.1 Types of measurement, Classification of instruments, Static terms and characteristics- Range and Span, Accuracy and Precision, Reliability, Calibration, Hysteresis and Dead zone, Drift, Sensitivity, Threshold and Resolution, Repeatability and Reproducibility, Linearity. Dynamic characteristics- Speed of response, Fidelity and Dynamic errors, Overshoot. <br> 1.2 Measurement of error- Classification of errors, environmental errors, signal transmission errors, observation errors, operational errors. <br> 1.3 Classification of transducers, active and passive, contact non contact,mechanical electrical, analog digital. |
| Unit-II <br> Displacemen <br> t, <br> Force and <br> Torque <br> Measureme nt | 2a. Select the displacement measuring sensor for measurement of displacement in the given system with justification. <br> 2b. Select the force measuring sensors for measurement of pressure in the given situtation with justification. | 2.1 Specification, selection and application of displacement transducer. Capacitive transducer, Potentiometer, LVDT, RVDT. <br> 2.2 Force Measurement Systemcharacteristic of force measurement, creep curve for force transducer. <br> 2.3 Force and Load Sensors- Types 0 t Load cell, load cell applications, |

| 1 nit | Unit Outcomes (UOs) (in cognitive domain) | Topies and Sub-topics |
| :---: | :---: | :---: |
|  | 2c. Select the relevant dynamometer for measuring the given torque with justilication. <br> 2d. Describe with sketches the procedure for measurement of displacement, force and torque using the given device. | construction and working of Quarlz force sensor. Force rings. <br> 2.4 Torque Measurement- Inline and Reaction Torque measurement <br> 2.5 Torque sensors- construction and working of Slip ring. Rotary Transformer. Infrared sensor. FM Transmitter. <br> 2.6 Dynamometers - construction and working of Transmission dynamometer. absorption dynamometer, Eddy current Dynamometer. |
| Unit- III <br> Pressure and <br> Temperatur <br> e <br> Measureme nt | 3a. Select the pressure gauge for measurement of pressure in the given situation with justification. <br> 3b. Choose the relevant instruments to measure temperature of the given system with justification. <br> 3c. Select the relevant pyrometer for given application with justification. <br> 3d. Describe with sketches the procedure for measurement of temperature and pressure using the given device. | 3.1 Pressure Measurement- Low pressure gauges- McLeod Gauge, Thermal conductivity gauge. Ionization gauge, Thermocouple vacuum gauge. Pirani gauge. High Pressure gaugeDiaphragm. Bellows. Bourdon tube, Electrical resistance type. Photoelectric pressure Transducers, piezoelectric type. <br> 3.2 Non-electrical methods-Bimetal . Liquid in glass thermometer and Pressure thermometer. <br> 3.3 Electrical methods- RTD, Platinum resistance thermometer. Thermistor, Thermoelectric methods - elements of thermocouple, Seebeck series, law of intermediate temperature, Jaw of intermediate metals. thermo emf Measurement. <br> 3.4 Pyrometers- Working and Principle of Radiation and Optical Pyrometer. |
| Unit- IV <br> Flow <br> Measurement | 4a. Identify the flow meter for the given situation with justification mentioning salient features. <br> 4b. Select relevant flow meter to measure flow in the given system with justification. <br> 1c. Describe with sketches the procedure for measurement of flow using the given Ultrasonic flow meter. | 4.1 Types of flow meter. Selection criteria for flow meter, classification <br> 4.2 Flow meters- application and construction of Orifice, venture tube, segmental wedges , pitot tube, Dall Tube. <br> 4.3 Variable area Meter- construction. working and principle of Rota meter, anemometer. <br> 4.4 Positive Displacement Flow meterconstruction, advantages and disadvantages of Coriolis Alopsificter, Oscillating piston flow mete |

| Unit | I/nit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
|  |  | Rotating vane flow meter. <br> 4.5 Ultrasonic flow meter- application and construction of Doppler and Transit time ultrasonic flow meter. |
| Unit-V Vibration and Strain Measurement | 5a. Select the relevant instrument for vibration measurement of given job with justification. <br> 5b. Describe with sketches the use of TFT analyzer for measuring vibration of the given system. <br> 5c. Identify the relevant strain gauges for measuring strain in the given system with justification. <br> 4d. Describe with sketches the procedure for measurement of strain in the given system using strain gauge. | 5.1 Concept of natural frequency, free body diagram and spring mass system. <br> 5.2 Vibration measurement elementprinciple and working of velocity pickup ,Accelerometer, Inductive Pick Up, Capacitive Pick Up, Stroboscope. <br> 5.3 Introduction to FFT Analyzer, working and application. <br> 5.4 Types of Strain gauges- bonded and unbounded, gauge factor, strain gauge selection criteria. <br> 5.5 Methods of strain measurement- Axial, bending, Torsional. <br> 5.6 Construction of foil, semiconductor and wire wound strain gauge. |
| Unit-VI <br> Miscellaneo us <br> Measureme nt <br> Sound, speed and humidity measuremen ts | 6a. Identify the relevant sound measuring device for the given situation with justification and mentioning the salient features. <br> 6b. Describe with sketches the use speed measuring instrument for the given system. <br> $6 c$. Select the relevant instrument for measuring Humidity in the given system with justification. <br> 6d. Describe with sketches the procedure for measurement of Humidity using the given device. | 6.1 Sound measurement, principle of Electro dynamic microphone and Carbon microphone. <br> 6.2 Speed measurement-working and principle of Eddy current generation type tachometer, incremental and absolute type, Mechanical Tachometers, Revolution counter and timer, Slipping Clutch Tachometer, Electrical Tachometers, Contact less Electrical tachometer. <br> 6.3 Humidity measurement-working and principle of Hair hygrometer, Sling psychomotor. |

Note: To attain the COs and competency, above listed UOs need to be undertaken to achieve the 'Application Level' and above of Bloom's 'Cognitive Domain Taxonomy'

## 9. SUGGESTED SPECIHICATION TABLE FOR QUESTION PAPLR DESICN

| Unit <br> No. | Unit Title | Teaching <br> Hours | Distribution of Theory Marks |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | $\begin{gathered} \mathrm{R} \\ \text { Level } \end{gathered}$ | $\begin{gathered} \text { U } \\ \text { Level } \end{gathered}$ | $\begin{gathered} \text { A } \\ \text { Level } \end{gathered}$ | Total Marks |
| I | Introduction to Measurement | 06 | 02 | 04 | 06 | 12 |
| II | Force and Torque Measurement | 10 | 02 | 04 | 06 | 12 |
| III | Pressure and Temperature <br> Mcasurement | 08 | 02 | 04 | 06 | 12 |
| IV | Flow Measurement | 08 | 02 | 04 | 06 | 12 |
| V | Vibration and Strain Measurement | 08 | 02 | 04 | 04 | 10 |
| VI | Miscellaneous Measurement | 08 | 02 | 12 | 08 | 12 |
|  | Total | 48 | 12 | 22 | 36 | 70 |

Legends: $R=$ Remember, $U=$ Understand, $A=$ Apply and above (Bloom's Rerised taxonomy)
Note: This specification table provides general guidelines to assist student for their learning and to teachers to teach and assess students with respect to altainment of UOS. The actual distribution of marks at different taxonomy levels (of $R, U$ and $A$ ) in the guestion paper may vary from above table.

## 10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related co-curricular activities which can be undertaken to accelerate the attainment of the various outcomes in this coursc: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:
a. Prepare journal based on practical performed in measurement laboratory. Journal consist of drawing, observations, required measuring tools, equipments, date of performance with teacher signature.
b. Prepare/Download a specifications of followings:
i. Measuring Tools and equipment in measurement laboratory.
ii. Machineries in measurement laboratory
c. Undertake a market survey of local dealers for measuring equipments and prepare a report.
d. Visit to any Tool room and observe the working of inspection and testing department. also prepare a report consisting
i. Different advanced Measuring Instruments
ii. Different Measuring standards and Calibration process
iii. Care and maintenance of measuring instruments observed.

## 11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:
a. Massive open online courses (MOOCs) may be used to teach various topics/sub topics.
b. ' $L$ ' in item No. 4 does not mean only the traditional lecture method, but different types of teaching methods and media that are to be employed to develop the outcomes.
c. About $15-20 \%$ of the topics/sub-topics which is relatively simpler or descriptive in nature is to be given to the students for self-directed learning and assess the development of the COs through classroom presentations (see implemenuxion guideline for details).
d. With respect to item No.10, teachers need to ensure to create opportunities and provisions for co-curricular activities.
e. Guide student(s) in undertaking micro-projects.
f. Before starting practical, teacher should demonstrate the working of instrument.
g. Instructions to students regarding care and maintenance of measuring equipments.
h. Show video/animation films to explain functioning of various measuring Instruments
j. Teacher should ask the students to go through instruction and Technical manuals of instruments

## 12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the begiming of the semester. In the first four semesters, the micro-project are group-based. However, in the filth and sixth semesters, it should be preferably be individually undertaken to build up the skill and confidence in every student to become problem solver so that s/he contributes to the projects of the industry. In special situations where groups have to be formed for micro-projects, the number of students in the group should not exceed three.

The micro-project could be industry application based, internet-based. workshopbased, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs , UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The total duration of the micro-project should not be less than 16 (sixteen) student engagement hours during the course. The student ought to submit micro-project by the end of the semester to develop the industry oriented COs.

A suggestive list of micro-projects are given here. Similar micro-projects could be added by the concerned faculty:
a. Predict and test the performance of sensors of various kinds, including strain gages, thermocouples, tachometers, displacement transducers, dynamometers, pressure gages and transducers.
b. Collect information of flow measuring devices.
c. Perfrom comparative study of different parameters of LVDT various contact sensors.
d. Perform comparative study of various non - contact sensors
e. Visit to automobile workshop and observe the various sensors used in car. also prepare report of the same i.e name , use, location, function.
a. Visit the market and collect the sensor brochures with specifications of different manufactures.
b. Prepare a list of instruments used for vibration measurement and analysis.
c. Vist a power plant or manufacturing industry and identify situations where these sensors and instruments are used for predictive maintenance and condition monitoring.

## 13. SUGGESTED LEARNING RESOURCES

| Program Name | $:$ Diploma in Mechanical Engineering |
| :--- | :--- |
| Program Code | $:$ ME |
| Semester | $:$ Fourth |
| Course Title | $:$ Fluid Mechanics and Machinery |
| Course Code | $: 22445$ |

## 1. RATIONALE

Knowledge of fluid properties, fluid flow and fluid machinery is essential in all fields of engineering. Hydraulic machines have important role in water supply, irrigation, power generation and also in most of the engineering segments. This course is intended to develop the skills to estimate loss in pipes, efficiency of hydraulic machines like turbine, pumps etc., head on a pump and select a pump for a particular application, diagonose and rectify the faults in pumps and turbines, replace pressure gauges and other accessories on hydrauic machines turbines, and apply their knowledge in hydraulics to select appropriate devices like pressure gauges, valves, flow devices, pipes etc for different field applications.

## 2. COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- Maintain hydraulic machinery using knowledge of fluid mechanics.

## 3. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:
a. Use Manometers and Bourden gauge to measure pressure.
b. Use flow meters to measure the rate of flow.
c. Maintain flow through pipes.
d. Maintain the jet impact on various types of vanes for optimum efficiency.
e. Maintain hydraulic turbines.
f. Maintain hydraulic pumps.

## 4. TEACHING AND EXAMINATION SCHEME

| Teaching Scheme |  |  | $\begin{gathered} \text { Credlit } \\ (L+T+P) \end{gathered}$ | Examination Scheme |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | P |  | Theory |  |  |  |  |  |  | Practical |  |  |  |  |  |
| L | T |  |  | Paper <br> Hrs. | ESE |  | PA |  | Total |  | ESE |  | PA |  | Total |  |
|  |  |  |  |  | Max | Min | Max | Min | Max | Min | Max | Min | Max | Min | Max | Min |
| 4 | - | 2 | 6 | 3 | 70 | 28 | 30* | 00 | 100 | 40 | 25\# | 10 | 25 | 10 | 50 | 20 |

(*): Under the theory PA, Out of 30 marks, 10 marks are for micro-project assessment to facilitate integration of COs and the remaining 20 marks is the average of 2 tests to be taken during the semester for the assessment of the cognitive domain UOS required for the attainment of the COs.
Legends: L-Lecture; $\boldsymbol{T}$ - Tutorial/Teacher Guided Theory Practice; P - Practical; C-Credit, ESE - End Semester Examination; PA - Progressive Assessment, (10) Internal Assessment \# External Assessment, *\# On Line Examination, ^ Computer Based Assessment
5. COURSE MAP (with sample (Os. Pros. Io (Os. Ab) ()s and topies)
'this course map illustrates an overview of the flow and linkages ol the topies at various levels of outcomes (details in subsequent sections) to be attained by the student by the end of the course, in all domains of learning in terms of the industry/employer identified competency depicted at the centre of this map.

Figure 1 - Course Map

## 6. SUGGESTED PRACTICALS/ EXERCISES

The practicals in this section are $\operatorname{PrOs}$ (i.e. sub-components of the COs) to be developed and assessed in the student for the attainment of the competency:

| S. <br> No. | Practical Outcomes (PrOs) | Unit <br> No. | Approx. <br> Hrs. <br> Required |
| :--- | :--- | :---: | :---: |
| 1 | Use Bourdon's pressure gauge and U-tube Manometer to <br> measure water pressure also Mcasure dischargc of watcr using <br> measuring tank and stop watch. | I | $02^{*}$ |
| 2 | Measure Total Energy available at different sections of a pipe <br> layout | II | 02 |
| 3 | Use Venturimeter to measure discharge through a pipe <br> Use Sharp edged circular orifice to measure discharge through a <br> pipe | II | $02^{*}$ |
| 4 |  |  |  |

| $\begin{gathered} \mathrm{S} . \\ \text { No. } \end{gathered}$ | Practical Outcomes (PrOs) | Unit <br> No. | Approx. <br> Hrs. <br> Required |
| :---: | :---: | :---: | :---: |
| 5 | Estimate Darcy's friction factor ' f ' in pipes of three different diameters for four different discharges | 111 | 02 |
| 6 | Determine frictional losses in sudden expansion and sudden contraction in pipe. | III | 02* |
| 7 | Determine frictional losses in bend in pipe. | 111 | 02 |
| 8 | Determine frictional losses in elbow in pipe. | 111 | 02 |
| 9 | Determine the force exerted by a jet on flat plate | IV | 02 |
| 10 | Use Pelton wheel test rig to determine overall efficiency | V | 02 |
| 11 | Dismantle a Centrifugal pump. | V1 | 02* |
| 12 | Assemble a Centrifugal pump. | VI | 02* |
| 13 | Determine overall efficiency of Centrifugal Pump | VI | 02 |
| 14 | Dismantle a Reciprocating pump | VI | 02* |
| 15 | Assemble a Reciprocating pump | VI | 02* |
| 16 | Determine overall efficiency of Reciprocating pump using Reciprocating pump test rig.* | VI | 02* |
| 17 | Determine percent slip of Reciprocating pump. | VI | 02 |
|  | Total |  | 34 |

## Note

i. A suggestive list of PrOs is given in the above table. More such PrOs can be added to attain the COs and competency. A judicial mix of minimum 12 or more practical need to be performed, out of which, the practicals marked as '*' are compulsory, so that the student reaches the 'Precision Level' of Dave's 'Psychomotor Domain Taxonomy' as generally required by the industry.
ii. The 'Process' and 'Product' related skills associated with each PrO is to be assessed according to a suggested sample given below:

| S. No. | Performance Indicators | Weightage in \% |
| :--- | :--- | :---: |
| 1 | Preparation of experimental set up | 20 |
| 2 | Setting and operation | 20 |
| 3 | Safety measures | 10 |
| 4 | Observations and recording | 10 |
| 5 | Interpretation of result and conclusion | 20 |
| 6 | Answer to sample questions | 10 |
| 7 | Submission of report in time | 10 |
| Total | $\mathbf{1 0 0}$ |  |

The above PrOs also comprise of the following social skills/attitudes which are Affective Domain Outcomes (ADOs) that are best developed through the laboratory/field based experiences:
a. Follow safety and ethical practices.
b. Practice good housekeeping.
c. Practice energy conservation.
d. Demonstrate working as a leader/a team member.
e. Maintain tools and equipment.
f. Update yourself about the latest advancements happening in the field of fluid mechanics and machinery.

The ADOs are not specific to any one Pro, but are embedded in many PrOs. Hence, the acquisition of the ADOS tikes place gradually in the student when s/he undertakes a series of practical experiences over a period of time. Moreover. the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

- "Valuing Level" in $1^{\text {st }}$ year
- 'Organising Level' in $2^{\text {na }}$ year
- "Characterising Level' in $3^{\text {rd }}$ year.

## 7. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of experiments, as well as aid to procure equipment by authorities concerned.

| S. <br> No. | Equipment Name with Broad Specifications | PrO. No. |
| :---: | :--- | :---: |
| 1 | Bernoulli's theorem Apparatus. | 1,3 |
| 2 | Dead weight pressure gauge calibrater. | 2 |
| 3 | Flow measuring devices (Venturimeter/ orifice meter) Apparatus. | 4 |
| 4 | Hydraulic coefficient test rig. | 5 |
| 5 | Determination of major losses /minor losses in pipe fittings Apparatus. | 6 to 11 |
| 6 | Impact of jet test rig | 12 |
| 7 | Pelton wheel test rig. | 13,14 |
| 8 | Francis turbine test rig | 15 |
| 9 | Turbine turbine test rig | 16 |
| 10 | Centrifugal pump test rig. | 19 t0 21 |
| 11 | Reciprocating pumps test rig. | 22 to 25 |

## 8. UNDERPINNING THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to develop UOs for achieving the COs to attain the identified competency.

| Unit | Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
| Unit - I <br> Properties of Fluid and Fluid Pressure | 1a. Compare the given two fluids based on the given physical properties. <br> 1b. Convert the pressure values from the chart of the given device and into the specified units. <br> 1c. Choose the relevant pressure measuring device for the given situation with justification. <br> 1d. Select the relevant pressure measuring devices for the given | 1.1 Properties of Fluids: Density, Specific gravity, Specific volume, Specific Weight, Dynamic viscosity, Kinematic viscosity, Surface tension, Capillarity, Vapour, Pressure, Compressibility <br> 1.2 Fluid Pressure and Pressure Measurement: Fluid pressure, Pressure head. Pressure intensity, Concept of absolute vacuum. gatige pressure, atmospheric pressune. absolute pressure; Simpldaind |

| Unit | I Init Outeomes (IV)s) (in cognitive domain) | Topics and Sub-topics |

| Unit -VI <br> Pumps | 6a. Select the relevant hydraulic pumps fo the given application with justification. <br> 6b. Calculate work required and efficiency of the given centrifugal pump ad data. <br> 6c. Draw characteristic curves of the given pump. <br> 6d. Calculate slip, efficiencies. and power required to drive the given reciprocating pump and data. <br> 6e. Select the suitable pump for the given situation with justification. <br> 6f. Describe the procedure to troubleshoot the given type of hydraulic pump with sketches. | 6.1 Centrifugal Pumps: Construction, principle of working, priming methods and Cavitation; Types of casings and impellers; Static head Manometric head, Work done, Manometric efficiency, Overall efficiency. Numericals based on above parameters, NPSH, Performance Characteristics of Centrifugal pumps and its trouble shooting, Construction, working and applications of multistage pumps. Working principle and applications of Submersible pumps and Jet pump. <br> 6.2 Reciprocating Pump: Construction, working principle and applications of single and double acting reciprocating pumps; Slip, Negative slip, <br> Cavitation and separation. Use of Air Vessels; Indicator diagram with effect of acceleration head and frictional head; Pump selection criteria- head, discharge |

Note: To attain the COs and competency, above listed UOs need to be undertaken to achieve the 'Application Level' and above of Bloom's 'Cognitive Domain Taxonomy'

## 9. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Unit No. | Unit Title | Teaching Hours | Distribution of Theory Marks |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | $\begin{gathered} \mathrm{R} \\ \text { Level } \end{gathered}$ | $\begin{gathered} \text { U } \\ \text { Level } \end{gathered}$ | $\begin{gathered} \text { A } \\ \text { Level } \end{gathered}$ | Total <br> Marks |
| 1 | Properties of Fluid and Fluid Pressure | 12 | 02 | 02 | 04 | 08 |
| II | Fluid Flow | 10 | 02 | 04 | 06 | 12 |
| III | Flow through Pipes | 10 | 02 | 04 | 06 | 12 |
| IV | Impact of Jet | 06 | 00 | 04 | 04 | 08 |
| V | Hydraulic Turbines | 12 | 02 | 04 | 08 | 14 |
| VI | Pumps | 14 | 04 | 04 | 08 | 16 |
|  | Total | 64 | 12 | 22 | 36 | 70 |

Legends: $R=$ Remember, $U=$ Understand, $A=A p p l y$ and above (Bloom's Revised taxonomy)
Note: This specification table provides general guidelines to assist student for their learning and to teachers to teach and assess studemts with respect 10 attainment of UOs. The actual distribution of marks at different taxonomy levels (of $R, U$ and $A$ ) in the question paper may vary from above table.

## 10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related co-curricular activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:
a. Prepare journals based on practical performed in laboratory.
b. Follow the safety precautions.
c. Use various mechanical measuring instruments and equipments related to fluid mechanics and machinery.
d. Read and use specifications of the hydraulic machines and equipments.
e. Library / Internet survey of hydraulics and hudraulic machines
f. Prepare power point presentation or animation for understanding constructional details and working of different hydraulic machines.
g. Visit nearby shops to identify different PVC and GI pipe fittings. Collect manufacturing catalogues related to the same.
h. Visit nearby shops to identify different pumps. Collect manufacturing catalogues related to the same and compare their salient features.
i. Prepare a list of commercially available software related to computational Fluid dynamics (CFD).
11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:
a. Massive open online courses (MOOCs) may be used to teach various topics/sub topics.
b. ' $L$ ' in item No. 4 does not mean only the traditional lecture method, but different types of teaching methods and media that are to be employed to develop the outcomes.
c. About $15-20 \%$ of the topics/sub-topics which is relatively simpler or descriptive in nature is to be given to the students for self-directed learning and assess fite development of the COs through classroom presentations (see implemenation guideline for details).
d. With respece to item No.10. teachers need to ensure 10 ereate opportumitios and provisions for co-curricular activities.
c. Guide student(s) in undertaking micro-projects.
f. Correlate subtopics with actual domestic and industrial fluidic systems.
!. Use proper equivalent anatogy to explain different concepts.
h. Use Flash/Animations to explain various fluid machinery and pipe line.
i. Use open source simulation software.

## 12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the beginning of the semester. In the first four semesters. the micro-project are group-based. However, in the fifth and sixth semesters, it should be preferably be individurally: undertaken to build up the skill and confidence in every student to become problem solver so that s /he contributes to the projects of the industry. In special situations where groups have to be formed for micro-projects, the number of students in the group should not exceed three.

The micro-project could be industry application based, internet-based, workshopbased. laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The total duration of the micro-project should not be less than 16 (sixteen) student engagement hours during the course. The student ought to submit micro-project by the end of the semester to develop the industry oriented COs.

A suggestive list of micro-projects are given here. Similar micro-projects could be added by the concerned faculty:
a. Prepare a pipe layout water suppy of your lab from supply reservoir and calculate the loss of head.
b. Prepare a chart of showing all the pressure and flow measuring devices.
c. Prepare a demonstration model of hydroelectric power plant.
d. Calculate running cost of your house hold pump and verify the electricity bill.
e. Gather information of hydroelectric power plants in Maharashtra, India and world.
f. Visit a hydroelectric power plant and write report.
g. Make a video to explain the Hydraulic power generation which could be understood by common man.
h. Select a pump for a coolant recirculation in lathe machine, Bore well pumps, pump at service station, pump used in water coolers, pump in purified water filter system with justification.
i. Download catalogue of pump manufacturer like kirloskar, cri,texmo,etc and compare their parameters.
j. Dissemble and assemble centrifugal pump for fault finding, troubleshooting and to identify wornout parts.
k. Prepare display chart of types of pipes on the basis of mareial, size and applications.

1. Study pressure gauges used by road side tyre worrks, blood pressure measurement by doctors., pressure gauges mounted on turbine test rig.
m . Visit to nearby pump manufacturing unit
n. Conduct market survey of pump suppliers and prepare report on technical specifications, area of applications, cost, material of different parts and maintenance procedure.

## 13. SUGGESTED LEARNING RESOURCES

| $\begin{gathered} \text { S. } \\ \text { No. } \\ \hline \end{gathered}$ | Title of Book | Author | Publication |
| :---: | :---: | :---: | :---: |

| Program Name | : Diploma in Mechanical Engineering |
| :--- | :--- |
| Program Code | $:$ NE |
| Scmester | $:$ Fourth |
| Course Title | $:$ Manufacturing Processes |
| Course Code | $: 22446$ |

## 1. RATIONALE

Diploma engineers require the knowledge of core principles of mamufacturing processes to design, analyze and manufacture industrial equipments, transport systems, aircrafts. robots and others. This subject intends to help the students in performing various operations on Lathe. Drilling machine. Shaper. Slotter. Welding and Foundry shop. It gives insight of how the raw material gets converted into finished products using various manufacturing processes an parameters.

## 2. COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- Produce components using conventional manufacturing processes.

## 3. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:
a. Produce jobs using lathe and drilling machines.
b. Produce jobs using shaping and slotting operations.
c. Prepare product using different casting processes.
d. Prepare product using different forming processes.
e. Use joining process to produce jobs.

## 4. TEACHING AND EXAMINATION SCHEME

| Teaching Scheme |  |  | $\begin{gathered} \text { Credit } \\ (\mathrm{L}+\mathrm{T}+\mathrm{P}) \end{gathered}$ | Examination Scheme |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | T | P |  | Theory |  |  |  |  |  |  | Practical |  |  |  |  |  |
| L |  |  |  | $\begin{aligned} & \text { Paper } \\ & \text { Hrs. } \end{aligned}$ | ESE |  | PA |  | Total |  | ESE |  | PA |  | Total |  |
|  |  |  |  |  | Max | Min | Max | Min | Max | Min | Max | Min | Max | Min | Max | Min |
| 3 | - | 2 | 5 | 3 | 70 | 28 | 30* | 00 | 100 | 40 | 25\# | 10 | 25 | 10 | 50 | 20 |

(*): Under the theory PA, Out of 30 marks, 10 marks are for micro-project assessment to facilitate integration of $C O S$ and the remaining 20 marks is the average of 2 tests to be taken during the semester for the assessment of the cognitive domain UOS required for the attainment of the C'Os.
Legends: L-Lecture; T-Tutorial/Teacher Guided Theory Practice; P - Practical; C-Credit, ESE - End Semester Examination; PA - Progressive Assessment. @ Internal Assessment, \# External Assessment, *\# On Line Examination, ^ Computer Based Assessment
5. COURSE MAP (with sample COs, $\mathrm{PrOs}, \mathrm{UOs}, \mathrm{ADOs}$ and topics)

This course map illustrates an overview of the flow and linkages of the topies at various levels of outcomes (details in subsequent sections) to be attained by the student by the end of the course in all domains of learning in terms of the industry/employer identified competency
depicted at the centre of this map.

## 6. SUGGESTED PRACTICALS/EXERCISES:

The practicals in this section are PrOs (i.e. sub-components of the COs ) to be developed and assessed in the student for the attainment of the competency:

| Sr . <br> No. <br> 1. | Practical Outcomes (PrOs) <br> Produce a plain turning iob on | Unit <br> No. | Approx. Hrs. <br> Required |
| :---: | :---: | :---: | :---: |
| 2. | Produce a plain turning job on lathe as per given drawing. Produce a step turning job on lathe as per given drawing | I | 02* |
| 3. | Produce a taper turning job on lathe as per given drawing. | I | 02 |
| 4. | Produce a turning job on lathe with knurling and chamfering operation as per given drawing | $\begin{aligned} & \text { I } \\ & \hline 1 \end{aligned}$ | $\frac{02}{02 *}$ |
| 5. | Produce an eccentric turning job on lathe as per given drawing |  |  |
| 6. | Produce turning job on lathe with threading operation as per given drawing | $1$ |  |

| Sr. <br> No. | Practical Outcomes (PrOs) | $\begin{aligned} & \text { Unit } \\ & \text { No. } \end{aligned}$ | Approx. Hrs. Required |
| :---: | :---: | :---: | :---: |
| 7. | Produce turning job on lathe with drilling and boring operations as per given drawing. | 1 | 02* |
| 8. | Use radial drilling machine to produce job with drilling, reaming, tapping and countersinking operation as per given drawing. | I | 02* |
| 9. | Produce drilling job on radial drilling machine with boring and spot facing operation as per given drawing. | I | 02 |
| 10. | Use radial drilling machine to produce job with counterboring and counter-sunk operation as per given drawing. | I | 02 |
| 11. | Produce a wooden solid pattern as per given drawing. | III | 02 |
| 12. | Produce a mould by using solid pattern/split pattern as per drawing. | III | 02* |
| 13. | Produce a simple Job/product with the help of Hand Plastic molding machine as per given drawing. | III | 02 |
| 14. | Produce a given job using TIG/MIG welding as per drawing. | V | 02 |
| 15. | Perform soldering / brazing operation on the given job. | V | 02* |
|  | Total |  | 30 |

## Note

i. A suggestive list of PrOs is given in the above table. More such PrOs can be added to attain the COS and competency. A judicial mix of minimum 12 or more practical need to be performed, out of which, the practicals marked as '*' are compulsory, so that the student reaches the 'Precision Level' of Dave's 'Psychomotor Domain Taxonomy' as generally required by the industry.
ii. The 'Process' and 'Product' related skills associated with each PrO is to be assessed according to a suggested sample given below:

| S. No. | Performance Indicators | Weightage in \% |
| :--- | :--- | :---: |
| a. | Preparation of Job drawing, selection of material, tool and <br> estimation of cutting parameters. | 20 |
| b. | Setup of machine, tool and Job | 15 |
| c. | Actual machining operation | 20 |
| d. | Inspection of Job using measuring instrument. | 15 |
| e. | Answer to questions on operations | 10 |
| f. | Submission of job and workshop diary in time. | 10 |
| g. | Safety precautions and good housekeeping | 10 |
|  | Total | $\mathbf{1 0 0}$ |

The above PrOs also comprise of the following social skills/attitudes which are Affective Domain Outcomes (ADOs) that are best developed through the laboratory/field based experiences:
a. Follow safety practices.
b. Practice good housekeeping.
c. Demonstrate working as a leader/or a team member.
d. Maintain tools and equipment in good working condition.
e. Handle the machine and tools with care.

The ADOs are not specific to any one Pro. but are cmbedded in many PrOs. Hence, the acquisition of the ADOs takes place gradually in the student when s/he undertakes a series of practical experiences over a period of time. Moreover. the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy" should gradually increase as planned below:

- 'Valuing Level' in $1^{\text {st }}$ year
- 'Organising Level' in $2^{\text {nd }}$ year
- 'Characterising Level' in $3^{\text {th }}$ year.

## 7. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED:

The major equipment with broad specification mentioned here will usher in uniformity in conduct of experiments, as well as aid to procure equipment by authorities concerned.

| S. <br> No. | Equipment Name with Broad Specifications | Pro. <br> No. |
| ---: | :--- | :---: |
| 1 | Center Lathe Machine (Length between centers : 2000 mmm) | 1 to 7 |
| 2 | Radial drilling machine (Drill diameter : upto 40 mm ) | 8 to 10 |
| 3 | Shaping/Slotting machine (Maximum stroke length : upto 150 mm ) | 11 tol |
| 4 | Pattern making, moulding and casting shop with necessary equipments. | 14 to16 |
| 5 | Plastic Hand Moulding Machine | 17 |
| 6 | Rolling mill made for Laboratory work | 18 |
| 7 | Hardness Tester with standard specification of Rockwell Hardness | 18 |
| 8 | Metallurgical Microscope ideal for examining Large and Single Side <br> polished Metal samples | 18 |
| 9 | Extruder and extrusion dies | 19 |
| 10 | Feed system mechanism. | 19 |
| 11 | Forging press | 20 |
| 12 | Dies and punches for press forging. | 20 |
| 13 | Reheating furnace | 20 |
| 14 | TIG/MIG welding set up with suitable specification | 21 |
| 15 | Soldering machine | 22 |

## 8. UNDERPINNING THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to develop UOs for achieving the COs to attain the identified competency.

| Unit | Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
| Unit-I <br> Fundamen tals of Machining and Machining Operations | 1a. Identify different machining operations to be performed for the given job with justification. <br> 1b. Explain with sketches the procedure of performing the given lathe machine operation on a job. <br> 1c. Explain with sketches the procedure of performing the given Drilling machine operation on a job. | 1.1 Machining Process: Mechanics of Chip formation, Single point cutting Tool and its geometry. Methods of Machining, Types of Chips, Principal elements of Metal Machining. <br> 1.2 Iathe: classification, specifications of center lathe; Basic parts of center lathe and their functions; Lathe accessories: chucks (three jaw 880 jaw, and magnetic chuck), mandrels; rests, face plates, centers, and angle- |

| Unit | Unit Outcomes (UOs) <br> (in cognitive domain) | 'ropics and Sub-topics |
| :---: | :---: | :---: |
|  | 1d. Select the relevant turning and drilling process parameters for the given job with justification. <br> 1e. Explain with sketches to measure cutting speed, feed, and depth of cut for the given job in turning and drilling operations. | plates; Lathe operations like facing, plain turning, taper turning, thread cutting, chamfering, grooving, knurling. Cutting tool nomenclature and tool signature. Cutting parameters -- speed, feed. depth of cut and machining time. <br> 1.3 Drill Machine: Classilication. specifications of radial drilling machine. <br> Basic parts of radial drilling machine, sensitive drilling and their functions. Drilling machine operations like drilling, reaming, boring, counter sinking. counter boring, spot facing. Cutting parameters - speed, feed, depth of cut and machining time. |
| Unit -II <br> Shaping/ <br> Slotting <br> Machines. | 2a. Explain with sketches the working of shaping and slotting machines with sketches. <br> 2b. Select the relevant cutting speed, feed, depth of cut for the given job with justification. <br> 2c. Calculate ratio of forward to return stroke time of the given shaping machine job. <br> 2d. Explain with sketches the procedure to produce keyway by the given machine as per the given sketch. | 2.1 Shaping Machine: Principle of working, classification, specification of standard shaper. Basic parts of standard shaping machine and their functions. Quick return mechanism. Different shaping operations. <br> 2.2 Slotting Machine: Principle of working, classification, specification. Basic parts of Slotting machine and their functions. |
| Unit - III Casting Processes and Plastic Moulding : | 3a. Design a pattern for the given job. <br> 3b. Design a mould for the given the job. <br> 3c. Explain with sketches the given casting process with skethes. <br> 3d. Select the relevant furnace for the given raw material with justification. <br> 3e. Select the relevant plastic moulding process for the given job with justification. | 3.1 Pattern making: Basic steps in making pattern, types, materials and allowances. <br> 3.2 Color coding of patterns <br> 3.3 Moulding: Types of moulding sands, properties of sand, moulding methods, cores and core prints. Elements of gating system. Bench and floor moulding methods. <br> 3.4 Casting: Safety practices / precautions in foundry shop. Furnaces, construction and workingo of cupola furnace, electric are furnace. Centrifugal casting-Methot and applications. Casting detects-7 |

| Unit | Unit Outcomes (IOs) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
|  |  | Causes and remedies. <br> 3.5 Plastic: Types of plastics; Plastic processing like Calendering and vacuum forming. <br> 3.6 Plastic moulding methods Compression moulding, Injection moulding. Blow moulding and Extrusion. Applications of plastic moulding methods. |
| Unit-IV <br> Forming <br> Processes | 4a. Select the relevant forming process for the given component with justification. <br> 4b. Identify the point of differences between forging, rolling and extrusion process with justification and sketches. <br> 4c. Explain with sketches the given extrusion process as per the given job with sketches. | 4.1 Drop forging: Introduction to forging. Upset forging, press lorging, open die and closed die forging operations, <br> 4.2 Rolling: Principle of rolling, hot and cold rolling. Types and applications of rolling mill. <br> 4.3 Fxtrusion: Direct and indirect extrusion. Advantages, disadvantages, applications of extrusion processes. |
| Unit-V <br> Joining <br> Processes | 5a. Explain with sketches the given joining process with sketch. <br> $5 b$. Select the relevant joining process for the given job with justification. <br> 5c. Select the relevant soldering/ brazing process for the given job with justification. <br> 5 d . Identify types of the welding defects in the figure given component with justification. <br> 5e. Select the relevant fillers as per the job with justification. | 5.1 Welding Processes: Gas welding, carbon arc welding, shielded metal arc welding, TIG welding, MIG welding, plasma arc welding, resistance welding types - spot, seam and projection. Electron beam welding, laser beam welding, welding defects. <br> 5.2 Introduction to soldering and brazing Process, fillers, heating methods and applications. |

## 9. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Unit <br> No. | Unit Title | Teaching | Distribution of Theory Marks |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Hours | R <br> Level | U <br> Level | A <br> Level | Total <br> Marks |
| IV | Forming Processes | 10 | 02 | 06 | 08 | 16 |
| V | Joining Processes | 06 | 02 | 02 | 04 | 08 |
| Total |  | $\mathbf{4 8}$ | $\mathbf{1 4}$ | $\mathbf{2 2}$ | $\mathbf{3 4}$ | $\mathbf{7 0}$ |

Legends: $R=$ Remember, $U=$ Understand, $A=A p p l y$ and above (Bloom's Revised laxonomy) Note: This specification table provides general guidelines to assist student for their learning and to teachers to teach and assess students with respect to allainment of UOS. The actual distribution of marks at different taxonomy) levels (of $R, U$ and A) in the guestion paper may vary from above table.

## 10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related co-curricular activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:
a. Visit a Foundry shop and observe the Centrifugal/Investment/Die Casting process and identify the different defects on the surface of component.
b. Visit a plastic molding industry and collect information on types of molding machines, its specification and observe various activities performed in a molding process.
c. Visit an industry where the operation like drop forging, rolling and extrusion are carried out. Collect information on types these machines, their specification and observe various activities performed and characteristics of output product.
d. Visit a Industry/workshop to observe the process like seam, spot, TIG and MIG welding. Collect information on these machines, their specification and observe these processes critically to get information regarding various accessories (electrodes, current rating etc.) used in these processes.
e. Collect information of recent advancement in manufacturing processes, machines/tools/equipment and their specifications/manufacturer and application in the industries.
f. Collect information of various forming processes used in industries. Observe shape of input and output products and suggest suitable operation for various jobs.

## 11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:
a. Massive open online courses (MOOCs) may be used to teach various topics/sub topics.
b. ' $L$ ' in item No. 4 does not mean only the traditional lecture method, but different types of teaching methods and media that are to be employed to develop the outcomes.
c. About $15-20 \%$ of the topics/sub-topics which is relatively simpler or descriptive in nature is to be given to the students for self-directed learning and assess the development of the COs through classroom presentations (see implementation guideline for details).
d. With respect to item No.10, teachers need to ensure to create opportunities and provisions for co-curricular activities.
e. Guide student(s) in undertaking micro-projects.
f. Demonstrate the diflerent components of the machine to the stadents thoroughty before they start doing the practice.
g. Demonstrate trouble shooting practice to the students.
h. Encourage students to refer different technical websites, videos of manufacturing processes to have deeper understanding of the subject.

## 12. SUGGESTED MICROPRO.JECT:

Only one micro-project is planned to be undertaken by a student that needs to be assigned to himber in the beginning of the scmestur. ln the first four semesters, the micro-project are group-based. However. in the lifh and sixth semesters. it shoukd be preferably be individually: undertaken to build up the skill and conlidence in every student to become problem solver so that s/he contributes to the projects of the industry. In special situations where groups have to be formed for micro-projects. the number of students in the group should not exceed three.

The micro-project could be industry application based. internet-based, workshopbased, laboratory-based or held-based. Each micro-project should encompass two or more COs which are in fact. an integration of PrOs. JOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The total duration of the micro-project should not be less than 16 (sixteen) student engagement hours during the course. The student ought to submit micro-project by the end of the semester to develop the industry oriented COs.

A suggestive list of micro-projects are given here. Similar micro-projects could be added by the concerned faculty:
a) Prepare a cast product of different mechanical engineering drawing models with wax material.
b) Prepare various types of welding joints (with metal components). Display them on wall board.
c) Fabricate types of keys like sunk key, woodruff key, spline etc.
d) Prepare various types of patterns/ core/ core box etc with suitable material.
e) Prepare a model of Quick-Return Mechanism using wood material.
f) Prepare model Pulley and Belt drive system used in the lathe.
g) Prepare Model of Direct Extrusion process.
h) Prepare Hammer forging working Model.

## 13. SUGGESTED LEARNING RESOURCES

## 1. RATIONALE

The world today is facing the biggest challenge of survival. Degradation of ecosystem, depletion of natural resources, increasing levels of pollution pose major threat to the survival of mankind. The need of the hour, therefore, is to concentrate on the area of environmental aspects, which shall provide an insight into various environment related issues. Environmental studies are an interdisciplinary academic field that integrates physical, chemical and hiological sciences. with the study of the enviromment. It provides an integrated, quantitative, and interdisciplinary approach to the study of environmental system \& gives an insight into solutions of environmental problems.

## 2. COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- Diagnose and manage environment related issues

## 3. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:
a. Develop Public awareness about environment
b. Select alternative energy resources for Engineering Practice
c. Conserve Ecosystem and Biodiversity
d. Apply techniques to reduce Environmental Pollution
e. Manage social issues and Envirommental Ethics as lifelong learning

## 4. TEACHING AND EXAMINATION SCHEME

| Teaching Scheme |  |  | $\begin{gathered} \text { Credit } \\ (L+T+P) \end{gathered}$ | Examination Scheme |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

(\#) Online Theory Examination.
(*): Under the theory PA, Out of 30 marks, 10 marks are for micro-project assessment to facilitate integration of COS and the remaining 20 marks is the average of 2 tests to be taken during the semester for the assessment of the cognitive domain UOS required for the attainment of the COs.
Legends: L-Lecture; $T$-Tutorial/Teacher Guided Theory Practicd/\&-Practicnds-Credit, ESE - End Semester Examination; PA - Progressive Assessment
5. COURSE MAP (with sample COs, POS, UOs. ADOs and topics)

This course map illustrates an overview of the flow and linkages of the topics at various levels of outcomes (details in subsequent sections) to be attained by the student by the end of the course, in all domains of learning in terms of the industry/employer identilied competency depicted at the centre of this map.

Figure 1 - Course Map

## 6. SUGGESTED EXERCISES

The practicals in this section are PrOs (i.e. sub-components of the COs ) to be developed and assessed in the student for the attainment of the competency:

| S. <br> No. | Practical Outcomes (PrOs) | Unit <br> No. | Approx. <br> Hrs. <br> Required |
| :--- | :---: | :---: | :---: |
| 1 | NIL |  |  |
|  | Total |  |  |

## Note

i. A suggestive list of PrOs is given in the above table. More sobrePbs can be added to attain the COs and competency. A judicial mix of minimun 82 or more practical need to be performed. out of which, the practicals marked as '*' dete conmplseny, simpat the student
rathes the 'Prectsion Level' of Dave's Psehomotor Domain Taxonomy' as generally reculired by the indusirs:
ii. The 'Process and Producl' relaled skillss associated with each $\operatorname{PrO}$ is to be assessed according to a suggested sample given below:

| S. No. | Performance Indicators | Weightage in \% |
| :---: | :---: | :---: |
| 1 | Total |  |
|  |  |  |

The above $\operatorname{PrO}$ s also comprise of the following social skills/attitudes which are Affective Domain Outcomes ( ADO ) that are best developed through the laboratory/field based experiences:
a. Follow safety practices.
b. Practice good housekecping.
c. Practice energy conservation.
d. Demonstrate working as a leader/a team member.
e. Maintain tools and equipment.
f. Follow ethical Practices.

The ADOs are not specific to any one PrO , but are embedded in many PrOs. Hence, the acquisition of the ADOs takes place gradually in the student when $\mathrm{s} / \mathrm{he}$ undertakes a series of practical experiences over a period of time. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

- 'Valuing Level' in $1^{\text {st }}$ year
- 'Organising Level' in $2^{\text {nd }}$ year
- 'Characterising Level' in $3^{\text {rd }}$ year.

## 7. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

| S. | Equipment Name with Broad Specifications | Pro. |
| :---: | :---: | :---: |
| No. | NIL | - |
| 1 |  |  |

## 8. UNDERPINNING THEORY COMPONENTS

The following topics are to be taught and assessed in order to develop the sample UOs given below for achieving the COs to attain the identified competency. More UOs could be added.

| Unit | Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
| Unit - I <br> Environme <br> nt | 1a. Discuss the scope of Environment. <br> 1b. Describe various types of environment <br> 1c. Describe the importance of environment studies. <br> 1d. Discuss about the need of public awareness about enviromment. <br> 1e. Describe | 1.1 Definitions, need of environmental studies. <br> 1.2 Segments of environmentAtmosphere, Hydrosphere Lithosphere, Biosphere. <br> 1.3 Environmental Issues - Green house effects, Climate change, Global warming, Acid rain Ozone layer depletion, Nuctare aferfents <br> 1.4 Concept of $\%$ 4R (Reduice, Reuse, |
|  |  |  |
| MSBISE-Final Copy Dil 20.04.2118 Page 3 of 7 |  |  |

| Unit | Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
|  | environmental issues. | Recycle and Recover), <br> 1.5 Public awareness about environment. |
| Unit- II <br> Energy <br> Resources | 2a. List various natural resources. <br> 2b. Describe Renewable. Nonrenewable and Cyclic resources. <br> 2c.State the causes and effects of depletion of resources. <br> 2d. State advantages and disadvantages of forms of energy. <br> 2e.Select appropriate solutions of efficient use of energy. <br> 2f. State the impacts of overuse of natural resources. | 2.1 Natural Resources - Forest Resources Water Resources, Energy Resources Land resources. Mineral resources. <br> 2.2 Renewable. Non-renewable and Cyclic Resources. <br> 2.3 Causes and effects of depletion of resources. <br> 2.4 Energy forms (Conventional and nonconventional). <br> 2.5 Present global energy use and future demands. <br> 2.6 Energy conservation. <br> 2.7 Over use of natural resources and its impacts on environment. |
| Unit- III <br> Ecosystem <br> and <br> Biodiversit <br> y | 3a. State the aspects and division of ecosystem. <br> 3b. State the general characteristics and function of ecosystem. <br> 3c. List levels of biodiversity. <br> 3d. Enlist the endangered species. <br> 3e. Describe value of biodiversity. <br> 3f. Suggest methods for biodiversity conservation. | 3.1 Frosystem - Definition, Aspects of ecosystem, Division of ecosystem, General characteristics of ecosystem, Functions of ecosystem. <br> 3.2 Biodiversity - Definitions, Levels, Value and loss of biodiversity. <br> 3.3 Biodiversity assessment initiatives in India. <br> 3.4 Threats and Hotspots of biodiversity. <br> 3.5 Conservations of biodiversity objects, various laws. |
| Unit-IV <br> Environme <br> ntal <br> Pollution | 4a. Define pollution. <br> 4b. State the sources of pollution. <br> 4c. State the effects of land pollution on environment and lives. <br> 4d. State various units and their functions of water treatment plant. <br> 4e. State the needs of water conservation. <br> 4f. State the impacts of sewage. <br> 4 g . State various units and their functions of sewage treatment plant. <br> 4h. State sources and effects of air pollution. <br> 4i. Describe various methods to prevent air pollution. <br> 4j. State sources and effects of noise pollution. | 4.1 Definition of pollution, types- Natural \& Artificial (Man- made). <br> 4.2 Soil / Land Pollution - Causes and effects on environment and lives preventive measures. <br> 4.3 Water Pollution - Sources of water (surface and sub surface), sources of water pollution, effects on environment and lives, preventive measures. BIS water quality standards, flow diagram of water treatment plant, Water conservation. <br> 4.4 Wastewater - Generation(domestic and industrial), Impacts, flow diagram of sewage treatment plant, CPCB norms of sewage discharge. <br> 4.5 Air pollution - Causes, effects, prevention, orempherbithair quality standards <br> 4.6 Noise perution - - Sources, effects, |

| Unit | Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
|  | 4 k . Describe preventive measures for noise pollution. <br> 41. State characteristics of solid waste. <br> 4 m . State the impacts of solid waste. <br> 4n. Describe incineration, RDF and sanitary landfilling. <br> 4o. State the standards limiting/controlling values of various types of pollution. | prevention, nonise levels at various zones of the city. <br> 4.7 Municipal Solid Waste, Bio-medical waste and [i-waste - Sources. generation. characteristics, effects, and methods to manage. |
| Unit-V <br> Social <br> Issues and <br> Environm <br> ental <br> Education | 5a. Elaborate article (48-A) and (51-A (g)) <br> 5b. Enlist various acts on environment and its provisions. <br> 5c. State the roles and responsibilities of CPCB. <br> 5d. Define sustainable development, and EIA. <br> 5e. Describe rain water harvesting and groundwater recharge. <br> 5f. Differentiate between formal and non formal education. | 5.1 Article (48-A) and (51-A (g)) of Indian Constitution regarding environment, Envirommental protection and prevention acts, CPCB and MPCB norms and responsibilities, The role of NGOs. <br> 5.2 Concept of sustainable development, EIA and environmental morality. <br> 5.3 Management Measures - Rain Water harvesting, Ground water recharge, Green Belt Development, Use of Renewable energy. water shed management, interlinking of rivers. <br> 5.4 Role of information technology in environment and human health. |

Note: To attain the COS and competency, above listed UOS need to be undertaken to achieve the 'Application Level' and above of Bloom's 'Cognitive Domain Taxonomy'

## 9. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Unit No. | Unit Title | Teaching Hours | Distribution of Theory Marks |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | $\begin{gathered} \mathrm{R} \\ \text { Level } \end{gathered}$ | $\begin{gathered} \text { U } \\ \text { Level } \end{gathered}$ | $\begin{gathered} \text { A } \\ \text { Level } \end{gathered}$ | Total Marks |
| I | Environment | 06 | 4 | 6 | - | 10 |
| II | Energy Resources | 10 | 4 | 8 | 4 | 16 |
| III | Ecosystem and Biodiversity | 08 | 4 | 4 | 4 | 12 |
| IV | Environmental Pollution | 16 | 8 | 8 | 4 | 20 |
| V | Social Issues and Environmental Education | 08 | 4 | 4 | 4 | 12 |
|  | Total | 48 | 24 | 30 | 16 | 70 |

Legends: $R=$ Remember, $U=$ Understand, $A=$ Apply and above (Bloom's Rexixted taxonomy) Note: This specification table provides general guidelines 10 assist smivent for ikeiv learning and to teachers to teach and assess students with respect to attaininentrof LOS. The actual
distribution of manks al different caronomy levels (of R. U and A) in the queston paper mas pary from above table.

## 10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related co-curricular activities which cam be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activitics in group and prepare reports of about 5 pages for each activily, also collect/record physical evidences for their (student's) porlfolio which will be useful for their placement interviews:
a. Plant and adopt a tree in your ncarby locality/Polytechnic campus and prepare report about its growth and survival after six months with photos.
b. Organize seminar on air pollutants of relevant MIDC area/vehicle
c. Organize poster exhibition about global warming and ozone depletion.
d. Visit a nearest water purilication/efthent treatment plant.

## 11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:
a. Massive open online courses (MOOCs) may be used to teach various topics/sub topics.
b. ' $L$ ' in item No. 4 does not mean only the traditional lecture method, but different types of teaching methods and media that are to be employed to develop the outcomes.
c. About $15-20 \%$ of the topics/sub-topics which is relatively simpler or descriptive in nature is to be given to the students for self-directed learning and assess the development of the COs through classroom presentations (see implementation guideline for details).
d. With respect to item No.10, teachers need to ensure to create opportunities and provisions for co-curricular activities.
e. Guide student(s) in undertaking micro-projects.
f. Use proper equivalent analogy to explain different concepts.
g. Use Flash/Animations to explain various topics.

## 12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the beginning of the semester. In the first four semesters, the micro-project are group-based. However, in the fifth and sixth semesters, it should be preferably be individually undertaken to build up the skill and confidence in every student to become problem solver so that $\mathrm{s} / \mathrm{he}$ contributes to the projects of the industry. In special situations where groups have to be formed for micro-projects, the number of students in the group should not exceed three.

The micro-project could be industry application based, internet-based, workshopbased, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The total duration of the micro-project should not be less than 16 (sixteen) student engagement hours during the course. The student ought to submit micro-project by the end of the semester to develop the industry oriented COs.

A suggestive list of micro-projects are given here. Similar micro-projects could be added by the concerned faculty:
a. Prepare a report on visit to PUC Center.
b. Visit a near by RO plant and prepare detail technical report
c. Prepare report on Household water filtration unit
d. Prepare a list of polluted natural resoures which are responsible for pollution and collect information on how to manage them.
e. Collection of Data from Hospital: Collect everyday information on percentage of solid hazardous and toxic waste for two month
f. Visit of Municipal Effluent Treatment Plant: Visit effluent treatment plant and prepare report on waste management.
g. Visit of Water Treatment Plant: Visit water treatment plant and prepare report on various units of water treatment and its management.
h. Preparation of report: Prepare the chart of solid waste management showing effects on environment.
i. And any other relevant topic related to course

## 13. SUGGESTED LEARNING RESOURCES

## 1. RATIONAL

The market driven economy demands frequent changes in product design to suit the customer needs. With the introduction of computers the task of incorporating frequent changes as per requirement is becoming simpler. Moreover, the technology driven competitive environment in today's market is compelling design/consulting engineering firms and manufacturing companies to seek CAD conversion of their existing paper based engineering documents. The focus of this course is to provide the student with hands-on experience in drafting and editing of an industrial production drawing using one of the commercial Computer Aided Drafting software with particular emphasis on the application of CAD software.

## 2. COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

## - Prepare digital drawings using computer aided drafting software.

## 3. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:
a. Use file management techniques in a CAD software.
b. Draw complex 2D geometric figures using a CAD software.
c. Modify complex 2D geometric figures using a CAD software
d. Use software to dimension and write text on existing 2 D geometric entities.
e. Use software to plot existing drawing with desired plot parameters.
f. Create Isometric drawings using a CAD software
g. Use layers and blocks to create digital drawings using relevant softwares.

## 4. TEACHING AND EXAMINATION SCHEME

| Teaching Scheme |  |  | $\begin{gathered} \text { Credit } \\ (\mathbf{L}+\mathbf{T}+\mathbf{P}) \end{gathered}$ | Examination Scheme |  |  |  |  |  |  |  |  |  |  |  |  |

|  | Total |  | 64 |

## Note

i. A suggestive list of $\operatorname{PrOs}$ is given in the above table. More such PrOs can be added to attain the COs and competency. A judicial mix of minimum 12 or more practical need to be performed, out of which, the practicals marked as '*' are compulsory, so that the student reaches the 'Precision Level' of Dave's 'Psychomotor Domain Taxonomy' as generally required by the industry.
ii. The 'Process' and 'Product' related skills associated with each PrO is to be assessed according to a suggested sample given below:

| S. No. | Performance Indicators | Weightage in \% |
| :--- | :--- | :---: |
| 1 | Developing/ using Institute Template | 20 |
| 2 | Selecting relevant set up parameters | 05 |
| 3 | Creating given drawing using relevant Commands. | 40 |
| 4 | Dimensioning the given drawing and writing text using <br> blocks and layers effectively. | $\mathbf{1 5}$ |
| 5 | Answer to sample questions | 10 |
| 6 | Submission of digital drawing file/plot in time | 10 |
|  | Total | $\mathbf{1 0 0}$ |

The above PrOs also comprise of the following social skills/attitudes which are Affective Domain Outcomes (ADOs) that are best developed through the laboratory/field based experiences:
a. Follow safe practices to operate CAD workstations.
b. Practice energy conservation.
c. Follow ethics and standards.

The Abos are not specitic to any one PrO, but are embedded in many Pros. Hence, the acquisition of the ADOs takes place gradually in the student when she undertakes a series of practical experiences over a period of time. Moreover, the level of achievement of the $\triangle D O$ s according to Krathwohl's "Affective Domain Taxonomy" should gradually increase as planned below:

- 'Valuing Level' in $1^{\text {st }}$ year
- 'Organising Level' in $2^{\text {nd }}$ year
- Characterising Level' in $3^{\text {rl }}$ year.

## 7. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of experiments, as well as aid to procure equipment by administrators.

| S. <br> No. | Equipment/Instruments/Other resources name with Broad <br> Specifications | PrO. <br> No. |
| :--- | :--- | :---: |
| 1 | Networked Licensed latest version of Computer Aided Drafting softwarc <br> freeware | All |
| 2 | CAD workstation with latest configurations for each student. | All |
| 3 | Plotter/Printer with latest versions. | All |
| 4 | LCD projector and Screen/ Interactive board | All |

## 8. UNDERPINNING THEORY COMPONENTS

The following topics/subtopics is to be taught and assessed in order to develop vOs for achieving the COs to attain the identified competency:

| Unit | Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
| Unit - I <br> Fundamentals <br> of CAD <br> Drawing Setup | 1a. Explain use of computer in drafting and designing. <br> 1b. Use the AutoCAD workspace and interface. <br> 1c. Work with the User Coordinate System and World Coordinate System. <br> 1d. Apply different object selection methods in a given situation <br> le. Open, save and close new and given drawings/ templates | 1.1 Fundamentals of Computer Aided Drafting (CAD) and its applications, Various Softwares for Computer Aided Drafting. <br> 1.2 Co-ordinate System- Cartesian and Polar Absolute, Relative mode. UCS, WCS. <br> 1.3 CAD initial setting commandsSnap, grid, Ortho, Osnap. Limits, Units, Ltscale, Object tracking. <br> 1.4 Object Selection methods- picking. window, crossing, fence. last and previous. <br> 1.5 Opening, saving and closing a new and existing drawing/template |
| Unit- II Draw, | 2a. Use viewing commands. <br> 2b. Apply formatting commands | 2.1 Zoom Commands - all. preywois. out, in, extent, Realtime. Chomamic. |

| Unit | Unit Outcomes (UOS) <br> (in cognitive domain) | Topics and Sub-topics |
| :---: | :---: | :---: |
| Enquiry, Zoom and Formatting Commands | 2c. Draw simple 2D entities using given draw commands <br> 2d. Determine coordinates, distance area, length. centroid of the given 2D entity | window, pan. <br> 2.2 Formatting commands - Layers, block, linetype, lineweight, color. <br> 2.3 Draw Command - Line, arc, circle, rectangle, polygon, cllipse, spline, block, hatch <br> 2.4 Enquiry commands - distance, area. |
| Unit- III <br> Edit and <br> Modify <br> Commands | 3a. Create given complex 2D entity using modify commands <br> 3b. Use grip command to manipulate given 2D entity | 3.1 Modify Command - Erase. trim. extend, copy, move, mirror, offset, fillet, chamfer, array, rotate, scale, lengthen, stretch, measure, break, divide, explode, align. <br> 3.2 Grips editing- Move, Copy, Stretch. |
| Unit- IV Dimensioning, Text and Plot Commands | 4a. Dimension given 2D entities using different dimensioning styles <br> 4b. Apply Geometric and dimension tolerance symbols on the given entity. <br> 4c. Write text on given 2D entity. <br> 1f. Create user defined dimension and text styles for a given situation <br> 4d. Plot given 2D entities using proper plotting parameters. | 4.1 Dimensioning commands Dimension styles, Dimensional Tolerances and Geometrical Tolerances, Modify dimension style. <br> 4.2 Text commands - dtext, mtext command. <br> 4.3 Plotting a drawing - paper space, model space, creating table, plot commands. |
| Unit-V Isometric Drawings, Layers, and Blocks | 5a. Draw isometric entities. <br> 5 b. Create isometric object from given orthographic views. <br> 5c. Use Layers for 2D drawings. <br> 5d. Create and modify blocks for given 2D entities. <br> 5e. Use blocks in same and in another given file. | 5.1 Isometric drafting, Isogrid, Isoplane, Polyline, Isocircle. <br> 5.2 Dimensioning Isometric drawings. <br> 5.3 Text writing on Isometric drawing. <br> 5.4 Layer, Layer properties and applications. <br> 5.5 Blocks: create, modify and use in same file and in another file. |

Note: To attain the COS and competency, above listed UOs need to be undertaken to achieve the 'Application Level' of Bloom's 'Cognitive Domain Taxonomy'

## 9. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER (INTERNAL) DESIGN

| Unit | Unit Title | Practice |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. |  |  |  |  |  |  |
|  |  | Distribution of Practical Marks |  |  |  |  |
|  |  | R <br> Level | U <br> Level | A <br> Level | Total <br> Marks |  |
| I | Fundamentals of CAD Drawing | 06 | - | 02 | 02 | 04 |

| Unit <br> No. | Unit Title | Practice <br> Hours | Distribution of Practical Marks |  |  |  |  |  |  |  |  |  |
| :---: | :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | R <br> Level | U <br> Level | A <br> Level | Total <br> Marks |  |  |  |  |  |  |  |  |
| II | Setup | Draw, Enquiry, <br> Zoom and Formatting Commands | 12 | 01 | - | 02 |  |  |  |  |  |  |
| III | Edit and Modify Commands | 24 | 02 | - | 08 | 10 |  |  |  |  |  |  |
| IV | Dimensioning, Text and Plot <br> Commands | 12 | 01 | - | 02 | 03 |  |  |  |  |  |  |
| V | lsometric Drawings, Layers, and <br> Blocks | 10 | 01 | 00 | 04 | 05 |  |  |  |  |  |  |
| Total |  |  |  |  |  |  |  | $\mathbf{6 4}$ | $\mathbf{0 5}$ | $\mathbf{0 2}$ | $\mathbf{1 8}$ | $\mathbf{2 5}$ |

Legends: $R=$ Remember, $U=$ Understand, $A=$ Apply and above (Bloom's Revised laxonomy)
Note: This specification table provides general guidelines to assist studen for their learning and to teacher's to teach and assess students with respect to attainment of UOs. The actual distribution of marks at different taxonomy levels (of $R, U$ and $A$ ) in the question paper may vary from above table.

## 10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related co-curricular activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:
a. Maintain a separate folder on Computer workstation allotted, in which all above mentioned practicals should be saved and will be submitted/ mailed as a part of term work.
b. Collect at least one 2D drawing like Production drawings, Layouts from nearby workshops/industries/builders/contractors and develop them using computer aided drafting approach.
c. Explain at least one problem for drafting to all batch colleagues. Teacher will assign the problem to be explained by student.
d. Assess at least one 2D drawing of other students ( $\Lambda$ group of 5-6 students may be identified by teacher) and note down the mistakes committed by the group. Selected students will also guide other students for correcting mistakes, if any.

## 11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:
a. Massive open online courses (MOOCs) may be used to teach various topics/sub topics.
b. ' $L$ ' in item No. 4 does not mean only the traditional lecture method, but different types of teaching methods and media that are to be employed to develop the outcomes.
c. About $15-20 \%$ of the topics/sub-topics which is relatively simpler or descriptive in nature is to be given to the students for self-directed learning and assess the development of the COs through classroom presentations (see implementation guideline for details).
d. With respect to item No.10, teachers need to ensure to create opportupho F TECHN provisions for co-curricular activities.
e. Guide student(s) in undertaking micro-projects.
f. Bring real objects in the classroom for demonstration purpose.
9. Demonstrate use of various commands of CAD using LCD projector/ interactive board. during hands on sessions.
h. Show videos and animations to explain use of layers, blocks and other relevant commands.
i. Demonstrate use of hardware like plotter.

## 12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the begimning of the semester. In the first four semesters, the micro-project are group-based. However, in the fifth and sixth semesters, it should be preferably be individually undertaken to build up the skill and confidence in every student to become problem solver so that s/he contributes to the projects of the industry. In special situations where groups have to be formed for micro-projects, the number of students in the group should not exceed three.

The micro-project could be industry application based, internet-based, workshopbased, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The total duration of the micro-project should not be less than 16 (sixteen) student engagement hours during the course. The student ought to submit micro-project by the end of the semester to develop the industry oriented COs.

A suggestive list of micro-projects are given here. Similar micro-projects could be added by the concerned faculty:
a. 2D Transmission: Each batch will identify fasteners, couplings, joints used in plastic machines and using CAD software prepare drawings. The figures should be labeled and dimensioned using software.
b. 2D Machinery components: Each batch will identify machinery components used in plastic machines and using CAD software prepare drawings. The figures should be labeled and dimensioned using software.
c. 3D Transmission: Each batch will identify fasteners, couplings, joints used in plastic machines and using CAD software prepare isometric drawings. The figures should be labeled and dimensioned using software.
d. 3D Machinery components: Each batch will identify machinery components used in plastic machines and using CAD software prepare isometric drawings. The figures should be labeled and dimensioned using software.
e. Digital Drawings: Each batch will identify manual drawings of machinery components used in plastic machines and using CAD software create digital drawings using relevant software.

## 13. SUGGESTED LEARNING RESOURCES

| S. <br> No. | Title of Book | Author | Publication |

| Program Name | $:$ Diploma in Mechanical Engineering |
| :--- | :--- |
| Program Code | $:$ ME |
| Semester | $:$ Fourth |
| Course Title | $:$ Fundamental of Mechatronics |
| Course Code | $: \overline{22048}$ |

## 1. RATIONALE

Rapid development in Technology and competitive economy has led to development of new trends in manufacturing Industry such as CNC Machines, Automation. FMS etc. which consists of combination of mechanical, electrical and electronic systems which is referred as Mechatronics. Diploma engineer in professional life has to operate and maintain systems being developed in the area of Mechatronics. In view of this, it is important for him to understand fundamental facts, concepts, principles and application of Mechatronics systems which enables him to work as technician to adopt an interdisciplinary approach of engineering while working on shop floor/industry.

## 2. COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

## - Operate and manipulate mechatronics systems as per requirements.

## 3. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:
a. Identify different instruments, sensor, actuators, microprocessor, software and mechanical components in mechatronics based systems.
b. Use sensor for different mechatronics applications.
c. Use transducers for different mechatronics based applications.
d. Use actuator for various mechatronics based applications.
e. Programme PLC for various applications.
f. Use microprocessor and microcontroller for various mechatronics based applications.

## 4. TEACHING AND EXAMINATION SCHEME

| Teaching Scheme |  |  | $\begin{gathered} \text { Credit } \\ (\mathrm{L}+\mathrm{T}+\mathrm{P}) \end{gathered}$ | Examination Scheme |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| L | T | P |  | Theory |  |  |  |  |  |  | Practical |  |  |  |  |  |
|  |  |  |  | Paper Hrs. | ESE |  | PA |  | Total |  | ESE |  | PA |  | Total |  |

| 2 | - | 2 | 4 | - | - | -- | -- | -- | -- | -- | 25\# | 10 | 25~ | 10 | 50 | 20 |

(-): For the practical only courses, the PA has two components under practical mibs. the assessment of practicals (seen in section 6) has a weightage of $60 \%$ (i.e. 15 mas ges) amm
micro-project assessment (seen in secton l2) has a weightage of tow (i.e. 10 marks) This is vesigned to facilitate atainment of (')s holisticallys as there is mo theory ESE
Legends: L-Lecture; T - Tutorial/Teacher Guided Theory Praclice; P - Practical; C - Credit. ESE - End Semester Examination; PA - Progressive Assessment, @) Internal Assessment, \# External Assessment, *\# On Line Examination. ^ Computer Based Assessment.
5. COURSE MAP (with sample COs. $\operatorname{Pr}()$ s. UIOs. ADOs and topics)

This course map illustrates an overview of the flow and linkages of the topics at various levels of outcomes (details in subsequent sections) to be attained by the student by the end of the course, in all domains of learning in terms of the industry/employer identilied competency depicted at the centre of this map.

Figure 1 - Course Map

## 6. SUGGESTED PRACTICALS/ EXERCISES

The practicals in this section are $\operatorname{PrOs}$ (i.e. sub-components of the COS) to be developed and assessed in the student for the attainment of the competency:

| $\begin{gathered} \mathrm{S} . \\ \text { No. } \end{gathered}$ | Practical Outcomes (PrOs) | Unit No. | Approx. Hrs. Required |
| :---: | :---: | :---: | :---: |
| 1 | Select sensors, actuators, transducers, PLC and Microcontrollers for given application with justification. | $\begin{gathered} \text { II. III. IV. } \\ \text { V.VI } \end{gathered}$ | 02* |
| 2 | Prepare small circuits using different sensors Proximity Sensor -NPN.NO.PNP, Limit Switch, Opto sensors. Pressure sensors, Motor-24V DC, interfacing facility with PLC used in Mechatronics systems | Il. III.IV.V | 02* |
| 3 | Verify the functions of Logic Gates for the given Ladder Diagram by using PLC | III, IV.V | 02* |
| 4 | Prepare small circuits using different transducers like linear and rotary transducers with PLC | IV.V | 02 |
| 5 | Develop ladder diagram and program PLC for Timers and Counters | III,IV, V | 02* |
| 6 | Prepare small circuits for door open and close application using different actuators with PLC. | III,IV,V | 02 |
| 7 | Develop ladder diagram and program PLC for Temperature control. | III.IV,V | 02* |
| 8 | Build Electro-pneumatic circuits for given application. | III,IV, V | 02* |
| 9 | Develop ladder diagram and program PLC for simulation of a pedestrian traffic controller. | III, IV, V | 02* |
| 10 | Develop ladder diagram and program PLC for Lift / elevator control | III, IV, V | 02* |
| 11 | Develop ladder diagram and program PLC for Washing machine control | III, IV, V | 02 |
| 12 | Develop ladder diagram and program PLC for Tank level control | III, IV, V | 02 |
| 13 | Develop ladder diagram and program PLC for Soft drink vending machine control | III, IV, V | 02 |
| 14 | Write a program for 8051 microcontroller for speed control of stepper motor. | IV,VI | 02* |
| 15 | Develop a program for 8051 microcontroller for relay interfacing. | III,IV,VI | 02 |
|  |  |  | 30 |

## Note

i. A suggestive list of $\operatorname{PrOs}$ is given in the above table. More such Pros can be added to attain the COs and competency. A judicial mix of minimum $120 r$ more practical need to be performed, out of which, the practicals marked as '*' are compulsory, so that the student reaches the 'Precision Level' of Dave's 'Psychomotor Domain Taxonomy' as generally required by the industry.
ii. The 'Process' and 'Product' related skills associated with each PrO) is to be according to a suggested sample given below:

| S.No. | Performance Indicators | Weightage in \% |  |  |
| :--- | :--- | :---: | :---: | :---: |
| a. | Preparation of experimental set up | 20 |  |  |
| b. | Setting and operation | 20 |  |  |
| c. | Safety measures | 10 |  |  |
| d. | Observations and Recording | 10 |  |  |
| c. | Interpretation of result and Conclusion | 20 |  |  |
| l. | Answer to sample questions | 10 |  |  |
| g. | Submission of report in time | 10 |  |  |
| Total |  |  |  | $\mathbf{1 0 0}$ |

The above PrOs also comprise of the following social skills/atitudes which are Affective Domain Outcomes (ADOs) that are best developed through the laboratory/field based experiences:
a. Follow safety practices.
b. Practice good housekeeping.
c. Practice energy conservation.
d. Demonstrate working as a leader/a team member.
e. Maintain tools and equipment.
f. Follow ethical Practices.

The ADOs ane not specific to any une PrO , but are embedded in many PrOs. Hence, the acquisition of the ADOs takes place gradually in the student when s/he undertakes a series of practical experiences over a period of time. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

- 'Valuing Level' in $1^{\text {st }}$ year
- 'Organising Level' in $2^{\text {nd }}$ year
- 'Characterising Level' in $3^{\text {rd }}$ year.

## 7. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of experiments, as well as aid to procure equipment by authorities concerned.

| S. <br> No. | Equipment Name with Broad Specifications | $\begin{gathered} \text { Pro. } \\ \text { No. } \\ \hline \end{gathered}$ |

|  | appliance. | Washing Machines, |
|  |  |  |

Note: To attain the COS and competency, above listed UOS need to be undertaken to achieve the 'Application Level' and above of Bloom's'C'ognitive Domain Taxonomy'

## 10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related co-curricular activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:
a. Visit any nearby industry and prepare a list of mechatronics devices available with specifications.
b. Do internet survey to create small mechatronics circuits.
c. Prepare power point presentation or animation for understanding working of different sensors, actuators, PLC and transducers.
d. Simulate different mechatronic systems using LabView/ hydraulic and pneumatic software.

## 11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:
a. Massive open online courses (MOOCs) may be used to teach various topics/sub topics.
b. ' $L$ ' in item No. 4 does not mean only the traditional lecture method, but different types of teaching methods and media that are to be employed to develop the outcomes.
c. About $15-20 \%$ of the topics/sub-topics which is relatively simpler or descriptive in nature is to be given to the students for self-directed learning and assess the development of the COs through classroom presentations (see implementation guideline for details).
d. With respect to item No.10, teachers need to ensure to create opportunities and provisions for co-curricular activities.
e. Guide student(s) in undertaking micro-projects.
f. Correlate subtopics with actual mechatronics based systems and applications.
g. Use proper equivalent analogy to explain different concepts.
h. Use Flash/Animations to explain various pneumatic, hydraulic and mechatronic systems.
i. Use open sume simulation soltware to model Pnemmatic. Electro-Pnematic and hydraulic cirenits and ladder diagrams.

## 12. SUGGESTED MICRO-PROJECTS

Onty one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the beginning of the semester. In the first four semesters. the micro-project are group-based. However. in the lilth and sixth semesters, it should be preferably be individually, undertaken to build up the skill and confidence in every student to become problem solver so that s/he contributes to the projects of the industry. In special situations where groups have to be formed for micro-projects, the number of students in the group should not exceed three.

The micro-project could be industay application based, internet-based, workshopbased, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact. an integration of PrOs, UOs and ADOs. Each student will have 10 maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The total duration of the micro-project should not be less than 16 (sixteen) student engagement hours during the course. The student ought to submit micro-project by the end of the semester to develop the industry oriented COs.

A suggestive list of micro-projects are given here. Similar miciu-projects could be added by the concerned faculty:
a. Design and testing of fluid power circuits to control
i. Velocity
ii. direction and
iii. force of single and double acting actuators
b. Perform speed control of $A C$ and $D C$ drives.
c. Dissemble a digital weighing machine and understand how weight is measured.
d. Dissemble a digital thermometer and try to understand how temperature is measured.
e. Prepare a report on use of mechatronics elements in washing machine, lift, microwave oven, ATM ete.
13. SUGGESTED LEARNING RESOURCES

| $\mathrm{S}$ | Title of Book | Author | Publication |
| :---: | :---: | :---: | :---: |
| 1 | Mechatronics | Bolton W. | Addison Wesley Longman Ltd., U.S.A. 1999, ISBN 9780582357051 |
| 2 | Mechatronics | H.M.T. | McGraw-Hill Education, New Delhi, 2000, ISBN: 0074636435 |
| 3 | Mechatronics Electronics in Production and Process | Dawson D.A., Burd <br> N.C., Loader A.I. | Chapman-Hall, 1993, Taylor \& Francis, ISBN 9780748757428 |
| 4 | Introduction to mechatronics and Measuring Systems | Histand Michael B. Alciatore David G. | McGraw-Hill, New Delhi, 2003 ISBN 9780072402414 |
| 5 | Mechanical Measurements and Instrumentation | Sawhney Puneet, Sawhney A.K. | Dhanpat Rai and Sons, 2013 New Delhi |
